

SHMICKO

Dry Steam Commercial Cleaning

Operating at temperatures >170°C, industrial grade dry steam:

Penetrates deep into the surface

Destroys pathogenic biofilms

Lifts dirt, grease and grime

Provides a clinical grade, clean, dry and sanitized environment

WHY CHOOSE DRY STEAM CLEANING?

Dry steam cleaning **reduces chemical usage by up to 100%*** as well as reducing water usage by up to 90%

Dry steam cleaning is effective on a variety of surfaces including **floors, walls, ceilings, tiles, grout, seats, wheelchairs, vinyl, mattresses, taps, sinks, metalwork** and more!

Dry steam cleaning is ideal in the healthcare setting, **eliminating multi-drug resistant organisms and up to 99.999% of bacteria and viral agents** (including COVID-19)

Dry steam cleaning **helps achieve your environmental targets** without compromising on efficiency or results!

Dry steam cleaning is ideal for use in the hospitality industry to remove deeply embedded grease and grime in **ovens, rangehoods, grills, cold storage, fridges, splashbacks, tiles and grout.**
