- INSPECTION PARTNERSHIP
- TECHNICAL SERVICE
- SUBCONTRACTOR REFERENCES

BEFORE & AFTER

SCP is proud to offer premier solutions for protecting concrete sewer structures. Whether you're dealing with chemical induced corrosion and I&I, or need an impermeable membrane, a liquid applied coating or troweled cement, we are experts in the wastewater coatings market space.

KEY PRODUCTS

- **SCP DropLiner**
100% Polyurea technology at it best! SCP DropLiner offers 425% elongation and excellent H2S corrosion protection. Sets up in 10 seconds which contributes to minimization of pinholes.
- **Plasite 4500**
Proven 100% solids epoxy with superior chemical resistance that has been protecting concrete for 40 years! Redner report approved and specified by owners throughout the world.
- **Reliner MSP & Max CA**
Cement and calcium aluminate solutions for corrosion protection. ReLiner and Maximum CA Plus provide toughness, durability, and corrosion resistance to gases caused by H2S.
