MORTISE ENTRY HANDLE - THUMBPIECE X THUMBPIECE SETS

Mortise entry handle - thumbpiece x thumbpiece sets are typically used on exterior doors. 9000 / 9100 series locks are standard.

- ◆ Base pricing for each set is determined by the highest tier level for the entry handle chosen.
- ◆ Through bolting is standard for most escutcheon sets, but surface mount is available with no upcharge if requested.
- ◆ Unless otherwise requested, the thumbpiece is paired with the corresponding entry handle.
- ◆ Extended lip strikes are available upon request. See the **Forms & Supplements** section for ordering form.
- ◆ Standard backsets for mortise locks: 2-1/2" and 2-3/4". Electrified, marine grade, magnetic, and Smart Locks priced on application. See **Locks & Latches** section for more information.
- ◆ **Add \$138** for each plate with KN (Knurl) edge details.
- ◆ For split finish orders, the face and strike plates are finished subject to door handing. **Add 10%** for split finish on all functions.

ENTRY HANDLE DUMMY SETS

Entry handle dummy sets are designed to work as companions to active 9000 / 9100 lock sets. They feature fixed thumbpieces and knobs or levers. Dummy sets can be used as pull plates on interior doors.

- ◆ Base pricing for each set is determined by the highest tier level chosen for the entry handle, knob or lever.
- ◆ Through bolting is used on all entry handle sets to assure solid attachment of the pull handles. Optional surface mount screws on the plates are available with no upcharge if requested.
- ◆ Unless otherwise requested, the thumbpiece is paired with the corresponding entry handle.
- ◆ A half dummy entry pull plate would utilize through bolts with bolt covers. See **PL-HD - Pull Plates** section for pricing.
- ◆ **Add \$138** for each plate with KN (Knurl) edge details.
- ◆ For split finish orders, the face and strike plates are finished subject to door handing. **Add 10%** for split finish on all functions.

Escutcheon full and half dummy sets feature fixed knobs or levers. ***These sets are identical for mortise or tubular applications.***

- ♦ Pricing for each set is determined by the tier level for the knob or lever. See **Door Knobs** or **Door Levers** section to select. There is no upcharge for medium plate sets.
- ♦ Through bolting is standard for escutcheon sets. Surface mount is available with no upcharge if requested. Specify handing for lever sets. Half dummy plates must use surface mount screws.
- ♦ Full dummy sets consist of two half dummy plates mounted on either side of the door. Door handing must be specified for every half dummy lever set.
- ♦ Full dummy sets can be installed on pre-bored doors, but the plate must be large enough to cover the bore in the door. A dummy face plate is provided for the door edge.
- ♦ **Add \$138** for each plate with KN (Knurl) edge details.
- ♦ **Add 10%** for split finishes on full dummy sets.

MORTISE SECTIONAL ENTRY SETS

A mortise sectional entry set features a mortise lock body. Entry sets are typically used on exterior doors where a 9000 / 9100 series lock is recommended.

- ♦ Pricing for each set is determined by the tier level for the knob or lever. See **Door Knobs** or **Door Levers** section to select.
- ♦ 9000 & 9100 mortise locks are recommended for exterior applications. Standard backsets: 2-1/2" & 2-3/4". **Add \$550** for 3-3/4" backset | **Add \$880** - 5" backset | **Add \$1,100** - 6" backset. Electrified, marine grade and magnetic locks priced on application. See **Locks & Latches** section for more information.
- ♦ 8700 & 8800 mortise locks can be used for narrow backsets: **Add \$88** for 1-1/2", 1-3/4", 2" or 2-1/4".
- ♦ Spring assists are not typically required for sectional mortise lock applications. If desired, a spring assist is available with standard mortise locks. Large rosettes are required. Not available with 8500 / 8600 series locks. See the **Rosettes & Cylinder Collars** section to select.
- ♦ Extended lip strikes are available upon request. See the **Forms & Supplements** section for ordering form.
- ♦ For split finish orders, the face and strike plates are finished subject to door handing. **Add 10%** for split finish on all functions.

Sectional Dummy Sets

- ♦ Sectional dummy sets are the same for tubular or mortise lock applications. See **TS-PS & TS-HD** for details and pricing.

MORTISE SECTIONAL PRIVACY & PASSAGE SETS

Mortise sectional privacy and passage sets features a mortise lock body. These sets are typically used on interior doors.

- ♦ Pricing for each set is determined by the tier level for the knob or lever. See **Door Knobs** or **Door Levers** section to select.
- ♦ 9800 series mortise locks are recommended for interior door applications. Available backsets are 2-1/2" & 2-3/4". The lock is configured knob/lever high (standard) or can be ordered knob/lever low. The spindle to thumb turn spacing is 2-7/8".
- ♦ 9500 series mortise locks can be used, but feature a smaller 2-1/4" spacing between the spindle and thumb turn.
- ♦ 9000 or 9100 locks used for extended backsets: **Add \$550** for 3-3/4" bkst | **Add \$880** - 5" bkst | **Add \$1,100** - 6" bkst.
- ♦ 8700 or 8800 locks used for narrow backsets: **Add \$88** for 1-1/2", 1-3/4", 2" or 2-1/4".
- ♦ No upcharge - knob x knob upside down | **Add \$99** - lever x lever upside down | **Add \$330** - knob x lever.
- ♦ Spring assists are not typically required for sectional mortise lock applications, but available upon request. Large rosettes are required. See the **Rosettes & Cylinder Collars** section to select.
- ♦ Extended lip strikes are available upon request. See the **Forms & Supplements** section for ordering form.
- ♦ For split finish orders, the face and strike plates are finished subject to door handing. **Add 10%** for split finish on all functions.

A tubular entry handle set is intended for pre-drilled doors and features a mechanism that transfers the up and down motion of the thumbpiece to a rotary motion that activates the tubular latch. This 'T2T' (Thumbpiece to Tubular) assembly requires unique door preparation as shown in the installation template provided with your order.

As with all tubular sets, the available backsets are 2-3/8" or 2-3/4". A spring assist is provided for the interior knob or lever.

The full dummy set features a fixed thumbpiece and lever or knob. It is intended for double door sets with one inactive leaf. See the **Entry Handle Dummy Sets** page for a diagram of this assembly.

TUBULAR ENTRY HANDLE SETS

Tubular thumbpiece x knob or lever sets are used on exterior doors that have been pre-drilled for tubular applications. Not available on doors under 1-3/4" thickness. Special door preparation is required to install this hardware.

- ♦ Through bolting is required for these escutcheon sets.
- ♦ Unless otherwise requested, the thumbpiece is paired with the corresponding entry handle.
- ♦ "T" or full lip strikes are available for the tubular latch. Extended lip strikes are available upon request. See the **Forms & Supplements** section for ordering form.
- ♦ The auxiliary deadbolt is provided with a re-enforced sub strike plate for added security.
- ♦ Available tubular backsets: 2-3/8" or 2-3/4". Standard latch to deadbolt spacing is 5-1/2". Custom spacing priced upon request. Verify center to center spacing before ordering.
- ♦ **Add \$138** for each plate with KN (Knurl) edge details.
- ♦ For split finish orders, the face and strike plates are finished subject to door handing. **Add 10%** for split finish on all functions.

TUBULAR ESCUTCHEON PRIVACY, PATIO & PASSAGE SETS - SMALL PLATES

A tubular escutcheon set features a standard passage latch for knob or lever. This may be coupled with a tubular mortise bolt for privacy or patio applications. The spacing between the latch and mortise bolt can vary to match existing door preparations. Sets may be configured with the knob or lever high (standard) or low. Specify the spindle location and verify the center to center measurements when ordering.

- ◆ Pricing for each set is determined by the tier level for the knob or lever. See **Door Knobs** or **Door Levers** section to select. Small escutcheons are standard for these sets, but a medium escutcheon may be substituted for no additional cost.
- ◆ Through bolting is standard for most escutcheon sets, but surface mount is available with no upcharge if requested.
- ◆ Available backsets for tubular latches and mortise bolts: 2-3/8" or 2-3/4".
- ◆ Spring assist units are provided standard with tubular latches.
- ◆ T-strike or full lip strike plates are available for tubular latch sets. See the **Additional Hardware** section to select. Extended lip strikes are available upon request. See the **Forms & Supplements** section for ordering form.
- ◆ Tubular privacy sets include a emergency release key.
- ◆ For split finish orders, the face and strike plates are finished subject to door handing. **Add 10%** for split finish on all functions.
- ◆ **Add \$138** for each plate with KN (Knurl) edge details.
- ◆ For full and half dummy escutcheon sets, refer to section ME-FD & ME-HD.

TUBULAR SECTIONAL PASSAGE & DUMMY SETS

A tubular sectional passage set features a standard passage latch for knob or lever.

- ♦ Pricing for each set is determined by the tier level for the knob or lever. See Door Knobs or Door Levers section to select.
- ♦ Available backsets for tubular latches: 2-3/8" or 2-3/4".
- ♦ Large rosettes and collars required for pre-bored doors. See the **Rosettes & Cylinder Collars** section to select.
- ♦ Mounting plates with spring assists come standard for all sets using tubular latches. Not available on doors under 1-3/8" thick. See the **Mounting Hardware** section for more information.
- ♦ "T" strike or full lip strike plates are available for tubular latch sets. See the **Additional Hardware** section to select.
- ♦ Extended lip strikes are available upon request. See the **Forms & Supplements** section for ordering form.
- ♦ For split finish orders, the face and strike plates are finished subject to door handing. Add 10% for split finish on all functions.

Sectional Dummy Sets

- ♦ Sectional dummy sets are the same for tubular or mortise lock applications.
- ♦ Full dummy sets consist of two half dummy sets mounted on either side of the door. Lever sets have one left hand and one right hand lever.
- ♦ Full dummy sets may be installed on pre-bored doors with a dummy face plate and large rosettes. A half dummy cannot be installed on pre-drilled doors.
- ♦ For lever half dummy set, specify required handing. Knob dummy sets do not require handing.

MORTISE DEADLOCK SETS

- A mortise deadlock is typically used as a stand alone lock or a supplement to a sectional passage sets. The lock functions independently of any latch mechanism, or can be used alone to secure doors or gates.
- ◆ 9500 series deadlock is standard. Available backsets 2-1/2", 2-3/4", 3-3/4", 5", or 6". Custom backsets are also available. See **Locks & Latches** section for more information.
 - ◆ 7200 series deadlocks are available with no upcharge. Available backsets 2-1/2" or 2-3/4" only.
 - ◆ For split finish orders, the face and strike plates are finished subject to door handing. **Add 10%** for split finish on all functions.

Tubular deadbolt and mortise bolt sets are installed on doors for additional security. They function independently from any latches or other locks found in the door.

- Available backsets for tubular deadbolts and mortise bolts: 2-3/8" or 2-3/4".
- Large rosettes and collars required for pre-bored doors. See the **Rosettes & Cylinder Collars** section to select.
- For easier installation, an exposed screw option on deadbolt interior trim is available upon request. Indicate "exposed screw" in the notes section for each line when ordering.
- Tubular deadbolts are provided with re-enforced sub strike plate for added security.
- For split finish orders, the face and strike plates are finished subject to door handing. Add 10% for split finish on all functions.

A European multipoint set is characterized by the use of lock cylinder that engages the lock with a rotating cam. The lock cylinder has a distinctive shape that is utilized for both keyed and thumb turn applications.

The escutcheon sets are lever high, and typically there is a 92mm (approx. 3-5/8") center to center spacing between the spindle and the lock cylinder. Some locks feature different spacing so it is important to confirm the spacing of your lock and specify the configuration on your multipoint check sheet. Refer to the **Forms & Supplements** section of the catalog for the check sheets.

If your lock does not conform to our pre-established configurations, we can manufacture plates to meet your specifications with no upcharge, but we must have complete information and signed print approvals before work will begin. Keep in mind that the measurements for European locks are in millimeters. Multipoint sets are manufactured to order and are not eligible for return.

EUROPEAN MULTIPOINT SETS

- ◆ Add \$138 for each plate with KN (knurl) edge details.
- ◆ Add \$550 for split finishes on entry function. Add 10% for split finish on all other functions.
- ◆ Through bolting is standard with multipoint sets.
- ◆ Narrow plates included in price. Custom sized plates priced on application.
- ◆ Due to the bi-directional operation of the locking mechanism, levers are required.
- ◆ Lock body and strike plates provided by door manufacturer. Full or half cylinders are provided according to function.
- ◆ Bi-directional spring assists are standard on multipoint sets. Special door preparation may be necessary.
- ◆ Multipoint check sheets are required for each order. Refer to *Forms & Supplements* section of the catalog for the check sheets.
- ◆ Multipoint sets are manufactured to order and are not eligible for return.

American multipoint sets are characterized by the use of lock cylinders that engage the lock with a tailpiece. Specify whether the tailpiece hub is in a vertical or horizontal position when the door is in the open (latch bolt retracted) position.

The escutcheon sets are typically lever low, but can be lever high. It is important to check the spacing of your lock and specify the configuration on your multipoint check sheet. Refer to the **Forms & Supplements** section of the catalog for the check sheets.

If your lock does not conform to our pre-established configurations, we can manufacture plates to meet your specifications with no upcharge, but we must have complete information and signed print approvals before work will begin. Keep in mind that the measurements may be in millimeters. Multipoint sets are manufactured to order and are not eligible for return.

A European multipoint set is characterized by the use of lock cylinder that engages the lock with a rotating cam. The lock cylinder has a distinctive shape that is utilized for both keyed and thumb turn applications.

Because of the various manufacturer lock specification, through bolt access is limited or not available for sectional trim. Our sectional multipoint hardware is only designed to be used with European profile locks. The trim is surface mounted to the door, so it is important to specify if the door is wood or metal clad. Doors are commonly wood interior with cladding on the exterior. We will provide the proper surface mount screws for the material in question.

Multipoint check sheets are required for each order. Refer to the **Forms & Supplements** section of the catalog. Offset cylinders may be required. If the lock is not centered in the door, indicate the position of the lock within the door.

SECTIONAL EUROPEAN MULTIPOINT SETS

- ◆ Due to the bi-directional operation of the locking mechanism, levers are required.
- ◆ Because through bolting is not possible, spring assists are not available for sectional multipoint trim sets.
- ◆ Lock body and strike plates provided by door manufacturer. Full or half cylinders are provided according to function.
- ◆ Multipoint check sheets are required for each order. Refer to **Forms & Supplements** section of the catalog for the check sheets.
- ◆ Multipoint sets are manufactured to order and are not eligible for return.
- ◆ **Add \$550** for split finishes on entry function. **Add 10%** for split finish on all other functions.

Active dummy and full dummy sets are configured to match existing entry, patio or passage sets. The active dummy will use a multipoint lock, but only the interior lever functions, while the exterior lever is fixed.

Dummy sets are mounted to the surface of the door the levers remain fixed. Full dummy sets include both a left hand and right hand lever. For a half dummy set, it is important that you specify the handing of the door.

Because of the various manufacturer lock specification, through bolt access is limited or not available for sectional trim. Our sectional multipoint hardware is only designed to be used with European locks. The trim is surface mounted to the door, so it is important to specify if the door is wood or metal clad. Doors are commonly wood interior with cladding on the exterior. We will provide the proper surface mount screws for the material in question.

Multipoint check sheets are required for each order. Refer to the **Forms & Supplements** section of the catalog.

SECTIONAL MULTIPOINT ACTIVE & FULL DUMMY SETS

- ◆ Multipoint sets use levers only.
- ◆ Because through bolting is not possible, spring assists are not available for sectional multipoint trim sets.
- ◆ Lock body and strike plates provided by door manufacturer.
- ◆ Dummy doors have no lock. Mount dummy hardware to match existing positions on active doors.
- ◆ Multipoint check sheets are required for each order. Refer to **Forms & Supplements** section of the catalog for the check sheets.
- ◆ Multipoint sets are manufactured to order and are not eligible for return.
- ◆ **Add 10%** for split finish on active and full dummy functions.

Sectional Dummy Sets

- ◆ Sectional dummy sets are the same for all lock applications. See **Tubular Sectional Passage & Dummy Sets** for more details.
- ◆ Full dummy sets consist of two half dummy sets mounted on either side of the door. Lever sets have one left hand and one right hand lever.
- ◆ For half dummy set, specify required handing.

FLUSH PULL ENTRY & PRIVACY SETS

Flush pull sets are designed to work on sliding pocket doors. Entry, privacy and patio sets use a 2002CPDL lock or a smaller 2001SDL lock. See **Locks & Latches** for details on these options.

The pricing for each set is determined by the size of the flush pull plates. Sizes: S = Small | M = Medium | L = Large. Measurements may vary depending on the collection chosen. Small flush pulls cannot be used with 2002 locks.

- ◆ Standard backset for 2001 & 2002 locks: 2-1/2" or 2-3/4".
- ◆ Doors must be no thinner than 1-3/8". Doors must be at least 1-3/4" for fully recessed plates - only available in Manor collection.
- ◆ Through bolting is standard on all flush pulls.
- ◆ **Add \$55** for each plate with concealed screws. Not available on all flush pull sizes and applications.
- ◆ **Add \$165** - 2" backset | **Add \$550** - 3-3/4" backset | **Add \$880** - 5" backset | **Add \$1,100** - 6" backset
- ◆ **Add \$138** for each plate with KN (Knurl) edge details.
- ◆ For split finish orders, the face and strike plates are finished subject to door handing. **Add 10% for split finish on all functions.**

FLUSH PULL PASSAGE & DUMMY SETS

Flush pull sets are designed to work on sliding pocket doors. Passage sets use a 2000 mortise edge pull. A 2002CPDP may be substituted to match entry, privacy or patio sets. See **Locks & Latches** for details on these options.

The pricing for each set is determined by the size of the flush pull plates. Sizes: S = Small | M = Medium | L = Large. Measurements may vary depending on the collection chosen. As depicted above, edge pulls do not have through bolt clearance, so small edge pulls must be installed above or below the edge pull.

- ♦ Substitute 2002CPDP edge pull, **Add \$193**. Small flush pulls cannot be used with 2002 locks.
- ♦ Doors must be no thinner than 1-3/8". Doors must be at least 1-3/4" for fully recessed plates - only available in Manor collection.
- ♦ Through bolting is standard on flush pulls. A half dummy flush pull is attached to the door with surface mount screws.
- ♦ **Add \$55** for each plate with concealed screws. Not available on all flush pull sizes and applications.
- ♦ **Add \$138** for each plate with KN (Knurl) edge details.
- ♦ For split finish orders, the face and strike plates are finished subject to door handing. **Add 10%** for split finish on all functions.

Pull plate sets combine escutcheon plates with appliance pulls. Some collections are not available for back to back applications. To assure firm pull strength, it is recommended that appliance pulls be used with through or back to back bolting.

N = Narrow Escutcheon M = Medium Escutcheon L = Large Escutcheon

- ◆ Custom sized plates for larger appliance pulls priced on application.
- ◆ Surface mount screws are available for the plates with no upcharge, but through bolting the pulls is still recommended.
- ◆ Pricing for each set is determined by appliance pull(s) selected along with the listed price for the size of the plates used. Small plates cannot be used for pull plate applications.
- ◆ **Add \$138** for each plate with KN (Knurl) edge details.
- ◆ **Add 10%** for split finish on all functions.

Screen door hardware is generally used on thin wooden doors. Traditionally it can be locked from the interior but does not feature emergency access from the exterior. Screen doors are often too thin for tubular latches and the thin 6500 series mortise lock is recommended.

- ◆ Pricing for each set is determined by the tier level for the knob or lever. See **Door Knobs** or **Door Levers** section to select.
- ◆ Available backsets for 6500 mortise locks: 1-1/2", 1-3/4" or 2".
- ◆ Available backsets for 9500 mortise locks: 2-1/2" or 2-3/4".
- ◆ For split finish orders, the face and strike plates are finished subject to door handing. **Add 10%** for split finish on all functions.
- ◆ **Add \$138** for each plate with KN (Knurl) edge details.
- ◆ Lever x knob sets priced per application.

ESCUTCHEON SCREEN DOOR SETS

- ◆ Screen door levers and knobs are a smaller size and lower projection than standards. A 7mm spindle is standard for these items. Lever set screws are centered and can be used interchangeably for left or right hand applications.
- ◆ Spring assists are not available on doors under 1-3/8" thick and are not recommended for screen door applications.
- ◆ Through bolting is standard for escutcheon sets, but surface mount is available with no upcharge if requested. Half dummy plates must be surface mounted.
- ◆ Full dummy sets consist of two half dummy plates mounted on either side of the door.
