## *Functional art for your shower*

The largest change in the bathtub business is the preference for a shower instead of a bathtub.

According to the American Institute of Architects' 2015 Home Trends Survey, 65 percent of homeowners like and want to have stall showers with no tub, up from 56 percent in 2014. Our *Iridess* solid surface showers were built for this growing trend of replacing bathtubs with showers in American homes.

- *Iridess* is available in four back wall designs, Diamond, Smooth, Origin, and Urban options. The back walls are complimented by flat panels on the side making it easy to install shower heads, steam fittings or body sprays.
- *Iridess* wall kits can fit with all Clarke acrylic or solid surface shower pans in the appropriate size.
- Made entirely of solid surface composites that last a lifetime. Solid surface is easy to maintain, and has a 30 year warranty.
- *Iridess* shower kits have minimal seam lines.

*Functional art that is sensual to the touch*
