HINGE STYLES

STANDARD WALL MOUNT

- Secures glass panel directly to the wall.
- Standard Wall Mount hinges are the best options for low-frequency (10 times per day or less) or medium-frequency (10-24 times per day) doors up to 120 lbs (54kg), without frame or door reinforcement.

HEAVY DUTY WALL MOUNT

- This will secure any large or custom glass directly to the wall.
- Heavy duty shower hinges can hold doors up to 140 lbs (63kg).

ADJUSTABLE WALL MOUNT

- This will secure the glass panel directly to the wall.
- Adjustable hinges can minimize the distance between wall and door edges to offer a tighter seal.
- Adjustable hinges allow you to set zero point of the hinge after installation and are suitable for any irregular wall conditions.

STANDARD GLASS-TO-GLASS MOUNT

- This will secure the shower door to any other glass wall.
- Standard duty shower hinges are the best options for low-frequency (10 times per day or less) or medium-frequency (10-24 times per day) doors up to 120 lbs (54kg), without frame or door reinforcement.

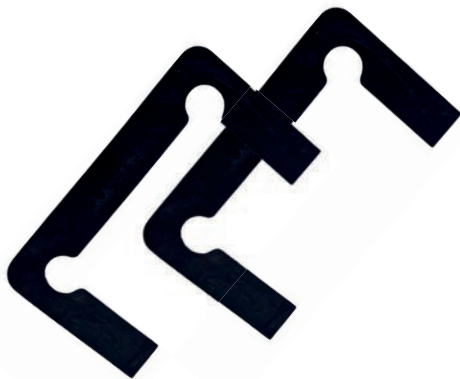

ADJUSTABLE GLASS-TO-GLASS MOUNT

- This will secure the shower door to any other glass wall.
- Adjustable hinges can minimize the distance between wall and door edges to offer a tighter seal.
- Adjustable hinges allow you to set zero point of the hinge after installation and are suitable for any irregular wall conditions.

GLASS CLAMP

- This will secure any static glass panel and is typically used on panel not using any hinges.

RUBBER GASKETS

- Each hinge comes with two options for Rubber Gaskets, so each hinge is compatible with both 3/8" or 1/2" thick glass.
- For 3/8" (10mm) Glass: Use one thick gasket on each side.
- For 1/2" (12mm) Glass: Use one thin gasket on each side.

HINGE SPECIFICATION PROCESS

The First Step of the Hinge Specification process is to work with your customer/designer/contractor and **establish which type of shower space they are creating.**

FIXED SHOWER SCREEN

- This option will only use the Bradford Glass Clamp Product.
- Use the weight of the glass to determine the number of clamps required

GLASS SHOWER DOORS

- This option will require either Wall Mount Hinges or Adjustable Wall Mount Hinges
- Important questions for this option:
 - What is the total weight of the door?
 - What style of hinge will match the other products in the shower: Straight (Dover) or Bevelled (Crosby)
 - Will we require adjustable hinges to help offset any Angles in the wall?
 - What finish is required to match all other products in the Shower?

CORNER SHOWER

- This option will require Glass-to-Glass Hinges and Bradford Glass Clamps
- Important Questions for this option:
 - What is the total weight of the door?
 - What style of hinge will match the other products in the shower: Straight (Dover) or Bevelled (Crosby)
 - Will we require adjustable hinges to help offset any Angles in the wall?
 - What finish is required to match all other products in the Shower?

HINGE SPECIFICATION PROCESS

DOOR AND PANEL SHOWER DOORS

- This option will require Wall Mount Hinges and Bradford Glass Clamps
 - What is the total weight of the door?
 - What style of hinge will match the other products in the shower: Straight (Dover) or Bevelled (Crosby)
 - Will we require adjustable hinges to help offset any Angles in the wall?
 - What finish is required to match all other products in the Shower?

NEO ANGLE SHOWER DOORS

- This option will require Adjustable Glass-to-Glass Hinges, Adjustable Wall Mount Hinges and Bradford Glass Clamps.
 - What is the total weight of the door?
 - What style of hinge will match the other products in the shower: Straight (Dover) or Bevelled (Crosby)
 - What finish is required to match all other products in the Shower?

SPECIFICATION SHEETS AND GLASS CUT OUTS

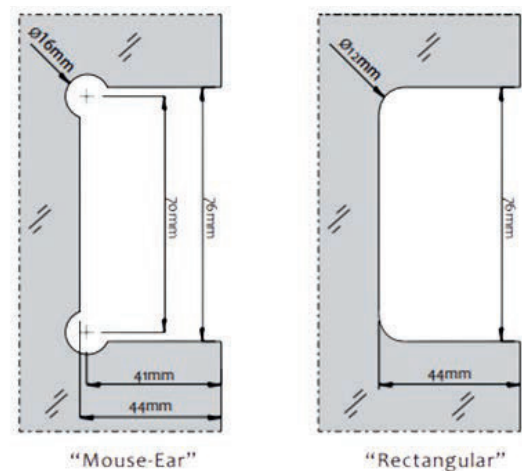

Once the Hinge and Clamp styles have been selected based on the shower space, the next step is to get the proper glass cut outs completed. All Kartners Hinge Products have detailed Specification Sheets on our website that indicate each cut out for installation, so its as simple as sending the specification sheet to the glazier and they can cut the glass accordingly.

There are two options for the glass cut outs:

1. MOUSE CUT

This type of hinge cut-out is designed to accommodate two steel pins within the body of the hinge. When using the “mouse ear” cut-out option, the hinge is secured by these pins, allowing the glass door to pivot smoothly.

- This is the most common cut-out, and is the most secure way to mount your shower door.
- All Kartners Hinges will require a Mouse Cut.

2. STANDARD HINGE CUT

In contrast, the “rectangular” Standard Hinge Cut: In contrast, the “rectangular” cut-out option is utilized when the two steel pins are removed from the hinge. This cut-out style provides an alternative way to install the hinge, allowing for different door movement configurations.

HINGE SPECIFICATION PROCESS

SHOWER DOOR WEIGHT & HEIGHT

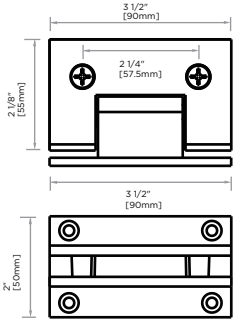

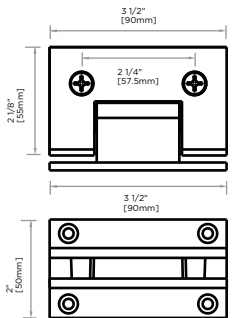

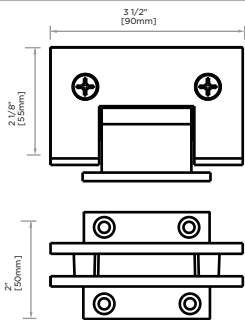

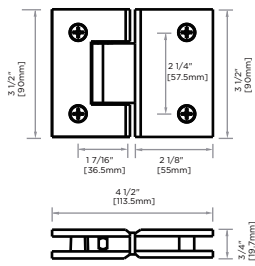

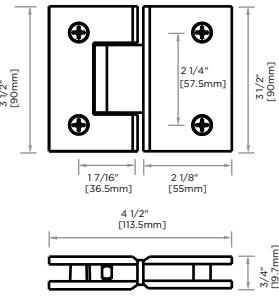

The weight of the shower will determine the number of Hinges and Clamps that will be required to secure the installation of the glass. In general, the width of a shower door may be between 22 inches and 36 inches. If the width is longer than 36 inches, you may have to include an extra panel to the door to support the weight of the structure.

The average height of a shower door is about 72 inches, although the maximum height will depend on the width and weight of the product.

Below is a chart that includes all the **technical weight information** for each Kartners Shower Hinge:

ITEM CODE	DESCRIPTION	GLASS THICKNESS	WEIGHT	LENGTH	NO. OF HINGES
51034	YORK - Wall Mount Hinge	5/16" (8mm) - 3/8" (10mm) and 1/2" (12mm)	80lbs (36kg)	28" (711mm)	2
