- Cause and Effect are very important to know:
 - Even though it seems really simple and pointless right now, it will help you A LOT down the road!
- Being able to identify Cause and Effect will help you grasp and understand future reading concepts such as inferences and predictions.
- Sometimes a cause has multiple effects.
- This is used to analyze books later in middle and high school.
- Make sure you are comfortable in identifying both.
- Life is full of cause and effect! Say you don't brush your teeth very well for a long period of time...the effect will be cavities!
