

## **Division: Tips**

- **MEMORIZE** your **fast facts**!
- **Never solve** long division problems **in your head**.
  - You can easily show and understand your work to solve the problem when you write it out.
- Get used to seeing **all** the 3 division symbols when solving multiplication problems
  - $\div$
  - $/$
  - $\Gamma$
- **ALWAYS CHECK YOUR WORK!**
  - Since multiplication is the inverse of division, you can use multiplication to check your answers!
  - Example: If  $5 \times 4 = 20$ , then  $20 \div 4 = 5$  and  $20 \div 5 = 4$
