

## **Time: Tips**

- Memorize **all** the time units
- **Always remember** how to tell time on an analog clock
  - You will **not always have a digital clock** in front of you!
- Always remember that there are different ways to tell time
  - People use different phrases to express the same time
    - “Noon” = 12:00 P.M.
    - “Half past 3” = 3:30 A.M. or P.M. (you would know A.M. or P.M. by how it looks outside)
- Be able to read regular and military time (It’s useful sometimes)
- You can use your awesome **math** (addition, multiplication) skills to be able to **read a clock faster**.
  - Use your mental math skills to be able to read the clock faster than anyone else!
    - When you see a 1 on an analog clock, think of 5; 2, think of 10; etc.
