Compare pdf and word document software

Compare pdf and word document free.

How do i compare a pdf and word document. Compare pdf and word document.

When editing or reviewing similar documents, you'll want to compare them side by side to note differences and similarities. Document comparison is useful for many reasons. Most people compare documents to check for plagiarism while others want to identify the best document out of the multiple they're comparing. Rather than do this manually, you should use online document comparison tools. You'll find many document comparison tools online but, in this article, I've listed out the best ones you can use. Best Online Document Comparison Software 1. Draftable Draftable is a popular online software for comparing PDF and Word documents. You can perform a side-by-side comparison of two documents; simply drag and drop the files in the provided space or click and upload. You can use Draftable to compare documents online for free. You don't have to create an account and you can compare documents with up to 300 pages. However, each document shouldn't be more than 10 MB. You can set Draftable to check for content changes only, style changes only, or content and style changes. Content changes check for word and sentence changes while style changes check for changes in text color, font style, size, and other formatting styles. From the comparison window, the changes are featured in the right-aligned tab and also highlighted in the document. You can print either or both documents directly from the website with all the highlights visible. You can download it as a PDF too. Aside from PDF and Word, you can compare PowerPoint files too. After comparing, you can share results with others using a secret URL or embed the comparison in your website.

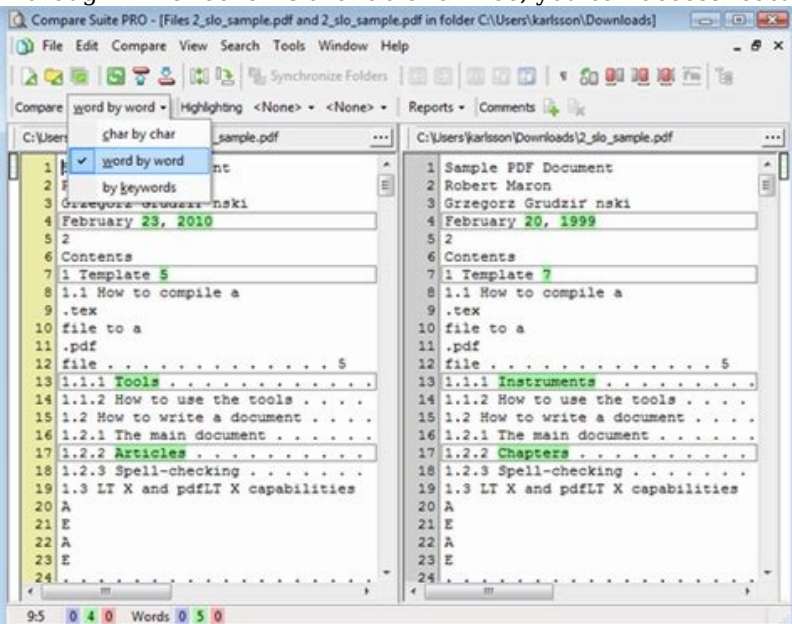

Draftable also includes a paid desktop version. Also Read: Free Online PDF Summarizer Tools 2. Copyleaks Copyleaks is a platform against plagiarism. The free File Compare tools lets you compare up to 10 documents at a time. You don't need an account to compare documents with Copyleaks unless you want to perform a private comparison. To compare documents, you either upload the files or copy and paste the text in the provided space.

If the work is published online, you can simply enter a URL to compare. Hence, with Copyleaks, you can compare documents with web pages. Note that Copyleaks only supports Word and PDF documents. Copyleaks is an advanced online document comparison software as it uses AI technology. The multi-language adaptability feature allows you to compare files in different languages. This online software calculates the similarities and differences in percentages. It checks for identical words, minor changes, and paraphrased and omitted words; you can turn off any of these features. The overall score tells you how unique or not one document is from the other and you can view the total number of similar words. If you have an account, you can download the comparison reports to your device. To get the best experience with Copyleaks, you should use Mozilla Firefox or Google Chrome browsers. 3. Diffchecker This is a user-friendly online text comparison software. As the name states it's a difference checker and helps you find the differences between two documents. You can copy and paste text or select a Word file. DiffChecker features an exclusive PDF comparison tool. Also, there are free tools for comparing images and Excel files. This tool works very fast. After pasting your text or uploading documents, you'll get results in less than five seconds after clicking the Find Difference button.

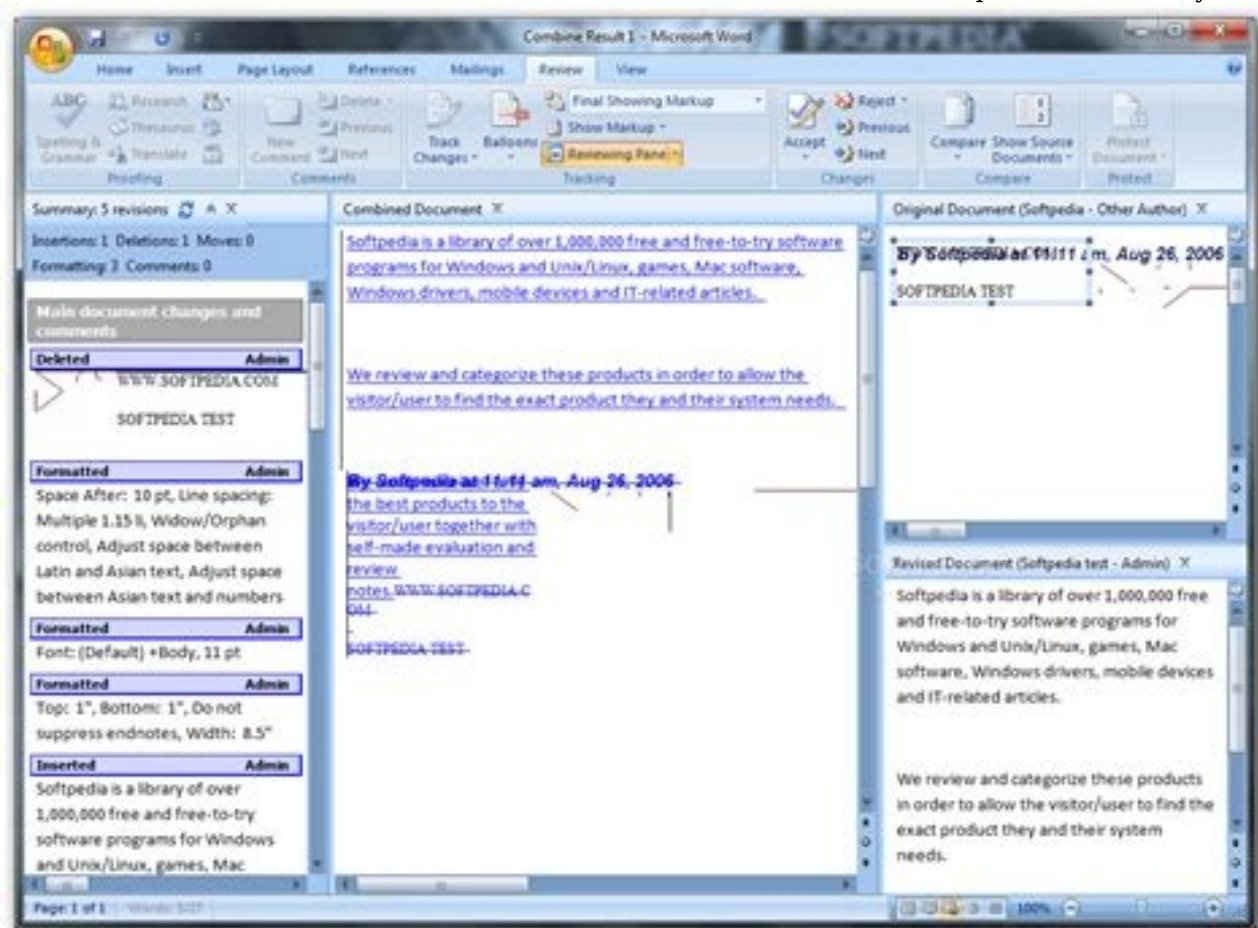

As mentioned earlier, this tool is only concerned about differences. It highlights differences in the first document in red and the other in green. You can switch text windows and merge texts/files.

When you compare PDFs, you can check for differences in text, image, OCR text, and file details. DiffChecker lets you save your comparison to expire in 24 hours, one week, one month, or never. You can share the results via public links and directly share them to Facebook and Twitter.

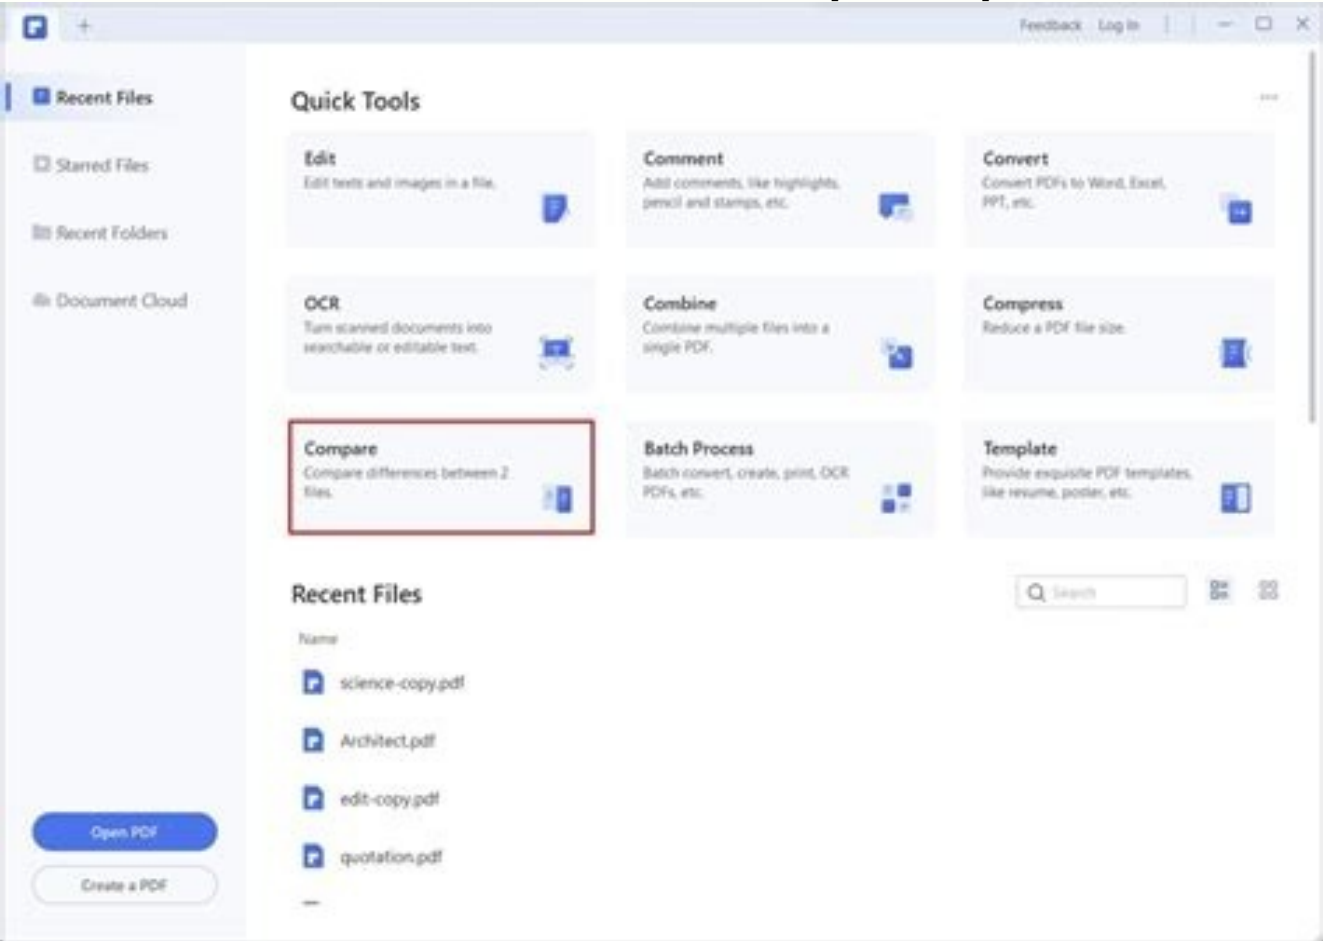

Although DiffChecker is available for free, you can access features like real-time comparison, unified view, character review, and private sharing if you purchase the pro version for \$8 per month. In addition, DiffChecker features a desktop version. Also Read: Best Summarizing Tools Without Plagiarizing 4.

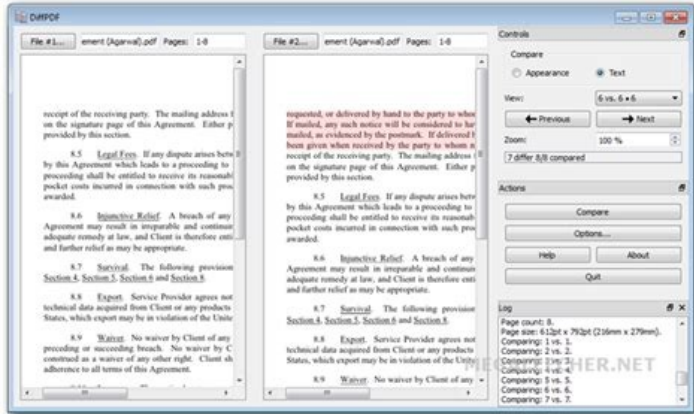

Simuldocs Simuldocs is exclusively for comparing Word Documents. The software does more than document comparison as it's collaboration software. Simuldocs has users in more than 60 countries including top institutions like Harvard University, Johns Hopkins, and companies like FedEx and Oracle. You can use Simuldocs for free but most of its features are premium. In addition, you have to register before using the free version. Afterward, simply upload your Word documents to compare. The online software highlights the differences between documents in red with a strikethrough effect. Note that you can't perform a side-by-side comparison with the free version. It first displays the newer document version you're comparing; you'll have to scroll to the bottom of the page to view the main document. You can download the full comparison as a PDF or share using a generated URL. Notably, you can collaborate with others for free with SimulDocs. However, the free version only supports one creator and document for collaboration. Also Read: Best PDF to Word Converters To Access all of Simuldocs document comparison features, you can subscribe to any of the following plans: Individual Plan: \$15 per month Squad Plan: \$35 per month Team Plan: \$75 per month 5.

Aspose Aspose is a popular online file processing platform and document comparison is one of its many features. The document comparison tool is packed with many features but is easy to use. You can compare Word, PDF, JPG, and HTML files all for free. To use this online software, choose and upload the two documents you want to compare. Next, choose what you want to focus on, words or characters. Also, you can choose to overlook differences in letter case. When you compare documents with Aspose, you download the results to your device. By default, the software will save the results in a Word document file. You can set the results to save as PDF, JPG, HTML, ODT, RTF, and many other file formats. Also, you can choose to send it to your email. In the comparison file, the differences from the base documents are highlighted in red with strikethrough effect; similar to SimulDocs mentioned earlier. However, the main text listed afterward is highlighted in red and underlined. If there are no differences in the two documents you're comparing, there'll be no highlights. The resulting file will be saved in the Aspose cloud for 24 hours after which it'll be permanently deleted. Also Read: Best PDF Editors For Windows 10 6. Text Compare This free online text comparison tool works for comparing Word, Excel, and PDF documents. You either paste your text or upload the file; if you upload, the tool will extract just the text. For your convenience, you can set the theme to Light, Dark, or High Contrast mode. Furthermore, Text Compare lets you select a specific language for the results. You can get your results in plain text, JSON, CSS, HTML, Java, and many other web languages. The tool is fast as you get results once you click Find Difference. You can set the results to inline view or word wrap. Text Compare states the number of changes in the documents at the bottom of the page.

Your documents aren't saved when you use this online document comparison software. Nevertheless, you can choose to save them for an hour, a day, week, month, or year. You get a unique URL when you save the results. Alternatively, you can export the results in a PDF file. For this, the tool merges the two documents; texts from the first document are highlighted in red while those from the second document are highlighted in green. Similar texts in both documents remain unchanged. 7. GroupDocs From your browser, you can compare two or more documents and view their differences using GroupDocs. So far, the tool has been used to compare more than 9,000 files to taking over 10 GB. GroupDocs support different MS Office formats including Word, Excel, PDF, PowerPoint, Visio, OneNote, and Outlook files. Each of these files has exclusive comparison tools. The platform supports other formats OpenDocument, AutoCAD, Web, Images, Text, and Portable. In total, there are more than 100 supported file formats. You can either click to upload or drag and drop the files you want to compare; then click on the Compare Now button. GroupDocs takes a few seconds to complete the comparison. The online software supports batch comparison of many documents and there's no file-size limit. From the results page, differences in the documents are listed in the right tab.

You can view changes in Category or List view, easily navigate between pages, and there's the Search tab to find specific word changes. As you review the results, you can choose to accept or reject changes. Furthermore, GroupDocs lets you export the comparison results in a merged PDF file. Also Read: Best PDF Editors For iPad 8. PDF24 PDF24 is a collection of multiple PDF tools. If you mainly want to compare PDF documents, the PDF24 compare tool is a free and unlimited tool you can use. You can still compare other file types like Word and image files but the tool first converts them to PDF before comparing. Developed by Stefan Ziegler, PDF24 is a very simple PDF comparison tool. After uploading the files you want to compare, simply set the comparison mode - Text or Visual - and click on compare. You get your comparison results in an instant. Like a few other document comparison tools on this list, PDF24 highlights the differences in red with the strikethrough effect. However, you can't download or share your results. You can only copy and paste the text. With PDF24, you don't have to worry about your files getting compromised. The file upload process is encrypted and all uploads are cleared automatically after an hour. PDF24 is an online document comparison software that you can use anywhere. It's optimized for browsers on Windows, Mac, Linux, or mobile devices. There are also installable apps for Windows and mobile devices. Explore: Best PDF Readers For iPad SmallSEOTools is online software that's been featured on top websites like LifeHack, Wikipedia, and Search Engine Journal. Among the platform's hub of web tools is a diff checker tool known as Text Compare. You have the option of entering a URL or pasting the different text you want to compare; there's no upload to upload files. The tool compares the first and second content side by side and calculates a similarity percentage. This percentage is calculated in relation to the total amount of text in the content. In addition, similar text in both texts will be highlighted in red. The texts will remain blank if there's no similarity. SmallSEOTools doesn't let you download or share the comparison results.

In fact, the content you enter is automatically deleted immediately after processing. You can, however, copy the result. This online document comparison software is recommended if you want to compare documents with short text or simple paragraphs. Since you can't upload files, it's not ideal for comparing documents with many pages. It's only ideal for comparing long documents if published online, hence, you can compare using the URL option. Also Read: Best Speedwrite Alternatives 10.

Aside from Word and PDF files, you can compare Excel, HTML, XML, and a few others. Also, GlobalVision Verify can compare documents in 30 different languages. As an enterprise-level online document comparison tool, Verify by GlobalVision is a premium tool; you can't use it for free. However, the pricing plans aren't public. You need to contact the sales team for a quote but you can use the tool for free on trial. Explore: Best Excel Alternatives For Mac 12. PDFForge PDFForge is popular for its PDFCreator app which has been in use for over 15 years. Also, it's still one of the best websites if you need free online PDF tools. The website features PDF Convert, Edit, and Organize tools. One of the available PDF organization tools on the platform is the Compare PDF tool. With the PDFForge tool, you can only compare PDF documents; it doesn't support Word or image files. In addition, you can only compare a maximum of two files. Nevertheless, PDFForge supports uploading documents up to 250 MB in size. After uploading the PDF documents, it takes seconds to generate results. You can set the comparison view as Inline or Side by Side. The tool renders the PDF files as TXT files in the results. The PDFForge Compare tool only highlights the differences between the two PDF documents. Differences in the first and second documents are highlighted in red and green respectively. You cannot download or export the results but you can copy the text. Your files are safe when you compare with PDFForge as the website is particular about data security. Uploaded texts are automatically deleted after two hours.

Check Out: Best MS Office Alternatives For Windows 13. eComparefiles At number 13, we have eComparefiles. This is a unique online document comparison software based on the results it generates. eComparefiles is free to use and you don't have to create an account. This online tool lets you compare Word, PDF, Excel, XML, Database, and Notepad files. Supported database files include db, db3, accdb, mdf, sqLite, and sqLite3 formats. However, you can only compare two documents/files at a time. When you click compare selected files after upload, you get a simple tabulated result featuring two columns - Similarities and Differences. eComparefiles checks the two documents and any similar text is featured in the first column with a count beginning from one. The sample applies to the Difference column but for dissimilar text. The lines and rows are highlighted in different colors depending on the level of difference. You can go through line by line to review each similarity and difference. However, the total number of each is

displayed at the top of each column so you get a quick overview. Note that you can't download or share the comparison results and the output pattern makes it impossible to copy the text. Also Read: Is MS Word an Example of System Software? 14. BlitzCompare BlitzCompare, a tool from Editive, lets you carry out simple document comparisons. Professional versioning and text comparison are some of the top features of the Editive collaboration software. However, BlitzCompare is an exclusive online option you can access for free. This online comparison software employs an HD-diff algorithm for a fast and precise comparison of documents. Thanks to its advanced algorithm, BlitzCompare offers better and more efficient document comparison than most other tools. Notably, BlitzCompare can point out differences in insertions, deletions, and moved blocks. You can compare Word, PDF, LaTeX, and a few other text formats. After uploading the documents, you can view the comparison results in one or two columns. From the results, moved words and sentences are highlighted in yellow, while similar texts are highlighted in red and green.

After comparing, the documents you upload are automatically deleted. If you want to save and share them, you need a BlitzCompare pro account. The pro plan also lets you download results in PDF format and it costs \$19 per month. Also Read: Best WPS Office Alternatives 15. ExtendsClass Created by Cyril, ExtendsClass provides a hub of free tools for developers including testers, code checkers, code testers, code converters, compare tools, and HTTP API tools. With the ExtendsClass PDF Compare tool, you can quickly compare two PDF texts online whether you're a developer or not. You can't use this tool to compare other document formats; it only supports PDF. Nevertheless, there are exclusive compare tools for XML and CSV files. You can compare documents by pasting the text into the provided space or uploading them from your computer. ExtendsClass PDF Compare also supports loading documents via URL; the webpage must be HTTPS. The software converts the PDF files you upload to TXT for comparison. With this, you get an instant result once you upload the second document; you don't have to click any compare button. The ExtendsClass PDF Compare tool displays the total number of differences between the documents while also highlighting them in green. You can navigate between differences using the Next Diff and Previous Diff buttons. Also Read: Best Google Docs Alternatives Conclusion Any of these best online document comparison software will automatically scan your documents and provide a report on how different or similar they are. With such tools, you'll be able to easily identify plagiarized works and also identify the most unique document to work with. Tom loves to write on technology, e-commerce & internet marketing. How about using the best document manager?Make all your documents accessible and secure using Adobe Acrobat Reader. This document management tool will also let you e-sign and create official forms to save your time at work. Get it for your PC and you will be able to: Open, print, and edit all your PDF and other file types Fill PDF forms easier Keep your essential documents encrypted Get all apps at a special price! Check the official website The world's Nr.1 document management software is now at a great price so hurry up! Comparing two documents to figure out the changes between them can be a time-consuming task. Especially when the documents run across several pages. Imagine having to compare documents side-by-side using two monitors. When your work involves comparing documents as a part of a structured review, every change matter. Earlier we shared a detailed guide on the best software to compare two documents. However, if you are explicitly looking for PDF comparison software, this is the guide you need. The tools listed in this article help you analyze and compare two PDF documents in no time. Some of the tools also offer merge functionality. While all the tools are capable of PDF documents, you can use these tools to compare other types of documents when supported. Let's take a quick peek at these products: Which is the best software to compare PDF documents? Soda PDF comes with the best all-in-one solution for your PDF needs, even with the comparing two PDF files feature tool. You can compare two PDF files in two different ways. One option that you have is to use the Compare Documents feature from the Review Module. This option is recommended because you can compare different versions of the same file, having highlights at every change. So, your files will open up next to each other showing all the differences between one and another. Another option is to use the Side By Side View feature from View Module that allows you to simply open up two files next to each other. Here, the disadvantage here is that for this option are no markings to indicate changes or differences in the document. Besides the comparison tool, you must know that you can edit with Soda PDF like any other word processor: you can add, remove, change, or modify the text, fonts, and colors directly in the PDF. Soda PDF Compare the PDFs you need and enjoy the best tools to edit or highlight parts of text! Check price Visit Website Adobe Acrobat Pro DC is the most powerful document comparison software for Windows and Mac.

The software can compare both files and folders and present the differences in visual text format. Also, you can scan the summary with all your changes.

Apart from offering a document comparison feature, it also allows you to convert documents to Microsoft Office-supported formats. As well, you can share the files with your team in order to be reviewed or signed. The most impressive thing is that Adobe Acrobat allows you to track the document until it gets to the destination person.

Adobe Acrobat offers a 2-way file comparison. You can view the differences between PDF documents in a side-by-side view, where you can visualize both PDF files, so you see the differences in a highlighted way. Also, you can select to view only the desired page with its changes. For folder comparison, you can use regular expressions-based file filters to include or exclude items, compare using file properties like size and data, compare a folder, or include all the subfolders and view folder comparison results in the tree view. You can compare PDF files in an easy way, so you have to select Tools > Compare Files. Then choose the older the newer file version you want to compare by clicking Select File > Compare Document. You can select Go to First Change in order to see the differences between those two files selected.

Adobe Acrobat Pro DC Adobe is an excellent tool that allows you to select filters by content, images, text, or annotations. Check price Visit Website ABBY FineReader is a powerful document comparison tool that supports multiple file formats.

It is a premium tool, but you can try the free trial for a limited time to try the software without any risk. One interesting feature offered by ABBY FineReader is the ability to compare two files of two different formats. For example, you can compare a PDF file and a Word document of the same file side by side without having to convert it to one specific file format. ABBY FineReader also offers a document editing and conversion feature. You can edit scanned images or PDF Files and any necessary information or correct typos directly from the ABBY FineReader editor. The scanned documents and images can be converted into multiple formats including Word, Excel, searchable PDF, and more. In addition, ABBY FineReader comes with a proofreading feature, and it can recognize decorative fonts for accurate results and support creative Ebooks by converting the documents to EPUB and FB2 format. ABBY FineReader is a robust document comparison tool. While the price tag is a little on the higher side, it can be justified with the features on offer. ABBY Fine Reader Try this robust document tool and compare your files easily. KIWI PDF Comparer is a PDF document comparison software that comes in both free and paid versions. The software can be used to detect changes in text and images. It can also show differences in movements, insertion and deletion, and more.

If you don't want to compare a complete PDF file, you can specify a region and KIWI will only compare the documents for changes in that region. It is a cross-platform program; as a result, you can run it on Windows, macOS, and Linux computers. It comes with two comparison modes, Text compare, and Compare Pixel to Pixel. The first one finds matches and differences in text and image files irrespective of the page. The Pixel to Pixel comparison finds differences for changes between pages like they are images. On the customization front, you can leave the header, side margins, and footers from comparison and also select what pages to compare in case the document has multiple pages. The software is easy to use and offers an intuitive user interface. To compare a file, simply load the PDF documents and customize it as per your requirement.

Click on Compare to initiate the scanning process. The changes are highlighted across the documents. You can change the thickness and color of the mark and other things to highlight the text over a complex background. The free version of KIWI only supports up to 100 pages of comparison. For extended features like Image comparison and print results, you need to upgrade to the premium version. = Get KIWI PDF Comparer Draftable is a cloud-based PDF document comparison solution. You can also download the standalone version of the tool to your PC, but that comes with only 14 days of a free trial. Draftable online is free to use and a better option if you have a few pages of information to compare and also if the documents are not confidential. To compare the documents, visit the website and upload the old and new documents that you want to compare. Click the Compare button to upload and start. The online version accepts a maximum of 10 MB upload with 300 pages of documents.

The offline version of Draftable, on the other hand, offers more privacy but is not free. Both the version supports multiple file-formats including Word, Excel, and PowerPoint. Similar to FineReader, Draftable also supports the comparison of documents of different file formats. = Get Draftable ExamDiff Pro is a premium PDF file comparison software that offers a multitude of features to advanced users. Apart from document comparison support for PDF and Office file formats, ExamDiff Pro also supports comparison between programming codes, executable files, and more. Using the tool, you can perform a two-way and three-way difference and merge the document. It also offers Line Inspector panel for easier recognition of differences within lines. The file differences can be saved to a dynamic HTML web page or taken as a printout. You can also add manual synchronization points to a text file, compare directly from the Explorer menu, etc. The Advanced Ignore option allows you to ignore cases, line break styles, comments, trailing, leading, and more. To extended functionality, you can download third-party plugins to add support for Doc formats, Fetch Remote File, and compressed file formats. ExamDiff Pro is a powerful tool and one of the most useful utilities that you can have as a programmer or web developer/designer. = Get ExamDiff Pro Araxis Merger is another file comparison tool that helps you to compare text from Microsoft Word to PDF files with ease. It can also spot changes between source, HTML, XML, and even other text file revisions. The file can be accepted, merged, edited, or deleted directly from the editor. The Pixel comparison feature allows you to compare image-based files for text changes. It also supports a 3-way comparison and automatic merging, but the feature is only limited to Pro users.

Other feature offered by Araxis Merger includes folder comparison and sync, direct access to SCM, portable report, printing and automation, and plugin support for extended functionality. Araxis Merge is available for both Windows and ac computers. You can download the free trial for 30 days before opting for the premium license. = Get Araxis Merger File comparison tools are not only handy for law firms and office work but also extremely useful for web developers and designers, programmers, and publishing professionals to compare source files, drafts, and web pages.

For basic needs, the free PDF document comparison tools offer enough features to find all the differences between the two documents. However, if you want a multi-purpose tool or have thousands of pages to compare, the premium tools in the article come with advanced features to compare any type of files. Have you used any of the PDF comparison files before? Do let us know your pick in the comments below. This article covers:Topics: Was this page helpful? 1 Start a conversation
