

Experienced Frontend Developer

Location: Remote

Start date: Immediate

Let Us Build The Infrastructure For Your Success

Want to build clean, fast user interfaces in a growing AI startup? Looking for a role where you can ship real features, use AI dev tools, and make a direct impact?

We're SpeedForce.AI, an AI company building a smarter, faster hiring system. Our product helps businesses streamline their recruitment process, saving time and improving hiring decisions.

Job Requirements and Experience

Frontend work at SpeedForce.AI means working directly on the product. You'll take ideas and translate them into real, usable features for our web app.

Must-have:

- Strong HTML, CSS and JavaScript skills
- Experience using browser APIs, especially MediaRecorder API
- Comfortable with AI dev tools like Lovable, Cursor IDE, or GitHub Copilot
- Able to handle API calls and integrate backend data
- Solid testing and debugging habits
- Proactive and able to work in a remote team

- Familiar with React, Vue.js, or other JS frameworks
- Basic sense of UX and interface logic
- Comfortable with Git and version control workflow.

What you'll do:

- Build a minimal frontend interface using HTML, CSS, JS
- Add in-browser audio recording using MediaRecorder API
- Create clear controls for input, audio recording and results
- Send and receive data through API calls
- Use Lovable/Copilot/Cursor IDE to save time and generate snippets
- Test, debug, and refactor your own code
- Coordinate with backend and product teams
- Keep code and documentation clean and updated

What we're looking for:

- Clean, functional code that works across browsers
- Fast learner with strong problem-solving habits
- Independent but open to team feedback

- Able to explain technical choices simply
- Consistent and accountable in remote setups

Bonus: Interest in AI tools or HR tech

Working with us

At SpeedForce.AI, we're building a startup culture that's direct, focused and open. We move fast, test often, and value practical output over fancy features. You'll work directly with our CEO, Product Developer and Marketing team to build features that get used.

You'll gain real experience in product development, AI tech and frontend performance. If you do well, there's a strong chance for a long-term or full-time role.

We support your development with:

- Pair programming and feedback from the tech lead
- Practical code reviews and real project scope
- Hands-on learning with AI dev tools
- Space to experiment with solutions and ship real code
- Growth into feature ownership or tech leadership.

Your benefits

We're a startup with a lean setup, but we offer meaningful support:

- Flexible remote hours

- Option to work from anywhere
- Direct access to product decision-making
- Monthly allowance (discussed in interview)
- Promotion path and long-term role opportunity
- Recognition for performance and contribution

Application process

To apply, fill out this form: <https://forms.gle/H4iEx2BT1DMDLE6K8>

If you have a GitHub, portfolio or code sample, email it to: huy.do@visa-dreams.com

If your experience matches, we'll contact you for a short screening. Then you'll meet our Founder for a quick technical review.
