Back-End Intern – Payment Integrations
 Focus: polar.sh / Lemon Squeezy / FastSpring

Responsibilities

- Build REST endpoints for checkout, plan changes, refunds, and webhook handling

- Integrate the three payment SDKs and handle signature verification and idempotency

- Store billing events in PostgreSQL or Firestore and match them against webhooks

- Write unit tests and publish OpenAPI specs or Postman collections

Required Skills

- Node.js with TypeScript (Express or Fastify)

- Strong async code handling and debugging

- Familiarity with subscriptions, SCA/3DS, and prorated billing

- Basic database modelling in SQL or NoSQL

- Clear Git workflows and writing good README files

Nice to Have

- Job queue experience (BullMQ, Cloud Tasks)

- Event-driven systems knowledge

Expectations

- Use generative AI tools daily (e.g. ChatGPT, Copilot), but check quality of outputs

- Clear communication and fast blocker reporting

- Share progress with demos, updates, and Slack stand-ups

- Remote role with preference for UTC+7 timezone overlap

- Part-time (20 h/week) or full-time (40 h/week)

Let Us Build The Infrastructure For Your Success
