**If you played last year then use that handicap for first 8 matches you play no matter what week you start playing, then switch to current stats, new players will have to figure handicap after the match is over.
10 – 7 scoring system. A win is always 10 points and loser of match gets 1 point for each ball pocketed. Each round is worth 1 point, total points is worth 1 point, for a total of 5 round point wins. On team averages whichever team has the lower team average gets the extra points, does not matter where they are in team standings.
Lowest handicap a player can be is 5.**

Handicaps are fractioned, to figure team handicap use the full handicap of all 4 players, add all 4 together and then subtract from the opposing teams total, and then round up or down and that will be the handicap. Example: Team 1's total is 32.51 and Team 2's total is 29.34 the difference subtracted is 3.17 so would be a 3 handicap. Round up or down after subtracting the 2 totals.

If the object ball you are shooting at is the 8 ball and you scratch and do not make the 8 ball it is just a foul – ball in hand – not loss of game. If you make the 8ball and scratch then it is loss of game

Be courteous of other players and do not be on your cell phone when you are playing a match
