

Camp Horizons

Administering Medication Policy

If a child attending Camp Horizons requires prescription medication of any kind, their parent or carer must complete a **Permission to administer medicine** form in advance. Staff will not administer any medication without such prior written consent. Camp Horizons will hold Medical records for two years

Ideally children should take their medication before arriving at camp. If this is not possible, children will be encouraged to take personal responsibility for their medication, if appropriate. If children carry their own medication (eg asthma inhalers), camp staff will offer to keep the medication safe until it is required. Inhalers must be labelled with the child's name.

Camp Horizons can only administer medication that has been prescribed by a doctor, dentist, nurse or pharmacist. However, if a medicine contains aspirin we can only administer it if it has been prescribed by a doctor. All medication provided must have the prescription sticker attached which includes the child's name, the date, the type of medicine and the dosage.

A designated staff member will be responsible for administering medication or for witnessing self-administration by the child; this is normally the Camp Manager. The designated staff member will check that the medication is properly labelled, and will ensure that it is stored securely during the session.

Before any medication is given, the designated staff member will:

- Check that Camp Horizons has received written consent
- Ask another member of staff to witness that the correct dosage is given.

When the medication has been administered, the designated person must:

- Record all relevant details on the **Record of Medication Given** form
- Ask the child's parent or carer to sign the form to acknowledge that the medication has been given.

When the medication is returned to the child's parent or carer, the designated person will record this on the **Record of Medication Given** form.

If a child refuses to take their medication, staff will not force them to do so. The manager and the child's parent or carer will be notified, and the incident recorded on the **Record of Medication Given**.

Certain medications require specialist training before use, eg Epi Pens. If a child requires such medication the manager will arrange appropriate training as soon as possible, at the cost of the parent. It may be necessary to absent the child until such training has been undertaken. Where specialist training is required, only appropriately trained staff may administer the medication.

A child's parent or carer must complete a new **Permission to Administer Medication** form if there are any changes to a child's medication (including change of dosage or frequency).

If a child suffers from a long term medical condition Camp Horizons will ask the child's parents to provide a medical care plan from their doctor, to clarify exactly what the symptoms and treatment are so that Camp Horizons has a clear statement of the child's medical requirements.
