

REGIONAL TRANSPORTATION PLAN

Sustainable Communities Strategy

StanCOG

Bicycle and Pedestrian Improvement Prioritization Plan

The **Bicycle and Pedestrian Improvement Prioritization Plan** focuses on identifying and prioritizing improvements that will connect communities within Stanislaus County for bicycle riders and pedestrians. This plan will complement the local plans developed by the cities and the county by providing linkages and connections to create a more seamless transportation system for those on bike and on foot.

to provide your input on how bicycle and pedestrian infrastructure can improve in your community

Creating walkable and bike-friendly environments is essential for fostering job creation, providing opportunities within the community, and attracting diverse businesses and active individuals. By prioritizing bicycle and pedestrian connections across various neighborhoods, a stronger sense of community and cohesive transportation network will be established. This will make active transportation safer and more enjoyable for everyone, while also enhancing the region's downtowns, shopping centers, and community cores.
