

"Damaged mystery" is probably too damaged to bother with. I'm not sure I'd want to put it in my album even if I figured out where it went.

"Greece mystery"

"Ukraine mystery"

"Latvia mystery" -- The base stamp is definitely from Latvia. It's pictured in Scott, but is not given a catalog number. The catalog doesn't say anything about the overprint, though.

"Japan mystery" has the typical Japan chrysanthemum crest. The inscription right below the crest looks vaguely like a Japanese Occupation script.

"Japan like mystery" has something that looks like a stylized chrysanthemum crest. Other than that, I'm blank.
