COMPETATIVE EXHIBITING:

1. The US Navy Mass Flight of January 1937: single frame exhibit construction complete--had been accepted for competition at the 2020 Willamette Valley Stamp Exhibition and PIPEX 2020 (both cancelled so hoping for next year).
2. An Introduction to Varney Air Grams: I have accumulated the material that I will be using for either a single frame or two frame exhibit that is in the conceptual stage right now (my next project to work on).
3. The Giori Press: a single frame exhibit introducing this stamp production process that results in multi-color stamps from a single pass of paper through the press. I've accumulated some material and have completed some of the research needed so I am in the early stages of conceptual development.
4. The Northwest's Own Air Mail Service: this will be a multi-phase exhibit project that will start with a one or two frame exhibit presenting an introduction to Contract Air Mail Route 5 through first flight covers and very early commercial usage then progressing through CAM 32,

Army Air Mail Service, combination of CAMs 5 and 32, all including route changes and additions, etc. Lot of research and material collection has been completed--need to start conceptual development.

#### SERIOUS COLLECTING

1. Greenland from the early polar bear parcel stamps through 1990: mostly working with postal history now instead of stamps.
2. Allied Military Government stamps: a general stamp collection for all issuing areas but am working on a specialized study of the AMG Germany issues (different colors, papers and perforations).
3. Ryukyu Islands: have pretty much completed a general stamp collection (still have some of the very expensive issues yet to acquire) but am working on early Army Post Office cancellations and a specialized study of the currency change issue (different colors, papers and perforations).
4. Bicycle (topical): have accumulated quite a bit of interesting material but my interest lies mostly with local bicycle post stamps and usages.

#### NOT SO SERIOUS COLLECTING

1. The modern US Officials: including usages on cover.
2. Sudan: mostly just the camel issues and some postal history.
3. Japan: not very actively and just because I think the stamps are beautiful.
4. Finland: general collection but concentrating on the very early issues.
5. US: general collection through 1960.
6. FDC Cachet collections: C25a, C31, Palomar issue, Gemini Space Twins issue.

#### ODDS AND ENDS

1. Worldwide Early Air Mail Issues: through 1933.
2. Zeppelin and Dornier material: worldwide stamps and some covers.
3. FAMs 14 and 18.
4. Haiti Air Mail Covers: up to WW2.
5. Germany: definitive stamp issues up through early 1950s and some other issues that I just like.
6. Miscellaneous CAM and FAM first flight covers.
7. Miscellaneous FDCs: just as they get my interest.
8. Little America Penguin Cachets from the Byrd Expedition: I started a specialized study of these several years ago and have thought about picking it up again actively.

#### NEW AREAS OF INTEREST

1. US Revenues.
2. US Post Office Seals.
3. US mail damaged in processing or transit.

**MEMBER 16**

I've collected stamps since I was a little girl, age 6, to present.

Have quite an extensive collection on US, UN, Germany, Norway, Vatican City.

Then instead of putting them stamp albums, I made exhibits on US flags, space,
