RE: Letter of Collaboration between Heavens to Betsy operated by Community Built Homes
and SAIT

Dear Tracy,

SAIT is pleased to provide this letter of collaboration to Heavens to Betsy operated by Community Built Homes and looking forward to working together to build trades programming for Indigenous communities.

The nature of the working relationship between Heavens to Betsy operated by Community Built Homes and SAIT is one of mutual dedication in support of indigenous learners as they begin their educational journey into the trades. With an understanding of the importance of providing equal opportunity to learning the various skill sets in the trades, Heavens to Betsy operated by Community Built Homes and SAIT want to ensure all individuals have access to learning through basic one-day seminars for homeowners to longer introduction to trades training programs, with the hope of getting students on the path towards an apprenticeship.

We look forward to a long partnership with a focus on indigenous growth for both individuals and communities as a whole.

Sincerely,

A handwritten signature in black ink that reads "Lauren Bishop".

Lauren Bishop
Indigenous & Non-Profit Client Development Manager
