24 Hour Emergency Service

August 2022 NEWSLETTER

The Premier Furnace Specialists newsletter is a new way to stay informed of all the featured and new products we manufacture to better serve our customers.

Not only will you find the latest and most innovative products but you will find the dates and locations of conferences and training sessions nearest to you so that you can stay up-to-date on the products that you work with the most.

At Premier Furnace Specialists Inc, we pride ourselves in providing the most reliable, competitive source of equipment, component parts and solutions to your thermal processing problems. Whether it's a new system, restoration, installation, maintenance, inspections, 24-hour emergency service or even a relocation, please don't hesitate to reach out with any questions or comments and let us show you that we truly are Premier Furnace Specialists.

Thank you!

Premier Spotlight

Premier Furnace Specialists Acquires Intellectual Property of BeaverMatic!

Premier Furnace Specialist Inc. acquired the intellectual property assets of BeaverMatic Inc. of Rockford, Ill. In 2015. Now with the purchase of BeaverMatic, we will be able to expand its product offerings and presence in the marketplace. Under the BeaverMatic name, we will continue to manufacture BeaverMatic's line of internal quench, car bottom, box, pit, and tip-up furnace systems. We will also continue to manufacture its line of pusher, roller-hearth, batch, brazing, sintering, and annealing mesh-belt furnaces along with our endothermic/exothermic generators and water systems.

The Purchase of BeaverMatic will add 50 years' experience to that of Premier's for a combined 72 years of expertise. Please visit our new BeaverMatic site beavermatic.com or premierfurnace.com.

AUGUST FEATURED PRODUCTS

30' x 30' x 30' Car Bottom Furnace.

As an Original Equipment Manufacturer, Premier Furnace Specialists fabricates a wide variety of furnaces and related equipment for the heat treatment industry. We can design and custom-build equipment to fit your specific needs.

We recently built a large, electrically-heated car bottom furnace that was designed and tested in our new 40,000 sq ft facility. The furnace is capable of processing 16X16 ft parts that weigh up to 80 tons each and can reach a max temperature of 1,400°F.

In keeping with current industry trends, the furnace has been designed to include all the necessary features required for strict compliance to current AMS 2750 standard.

If you would like more information about this or any of the products we manufacture, please contact sales@premierfurnace.com or 248-596-9000.
