RE: Letter of Recommendation

We have been using Data Net Communications for over 10 years. The reasons being is that they do professional high quality work for the lowest possible price, Shawn and his team always come through when I need them in a pinch and always with a smile. We have many locations, and at some sites we have demanding staff, but no matter where or what task is at hand I always get compliments of the work performed and professional mannerisms that just seems to come naturally with all of Shawn's staff.

Providing excellent service, not cutting corners, and focusing on safety is what PB prides itself in and that is exactly the same with Data Net Communications. This is why we will keep using them on future projects and is also why I am happy to write this letter of recommendation.

Very truly yours,

PARSONS BRINCKERHOFF, INC.
