

# Cozumel Dive Trip

## 9-16 March 2019

### Diving, Diving & More Diving

Cozumel offers the best drift diving you can get and Scuba Club Cozumel is one of few places here that offers unlimited shore diving. We made the most of it by constantly being in the water, from afternoon shore dives, to twilight shore dives, to night dives from shore. All mixed in with good food and good company, we can get enough of this place!

## Cozumel Drift Diving

Jump off the boat and ride the current is the kind of diving that takes place in Cozumel. No kicking or navigation, just glide along beautiful coral reefs and the boat will pick you up when you surface.

Nothing compares to the amazing coral formations and swim throughs you will find in Cozumel either. The current of this water way leads to towering columns of coral, large lobster and the biggest parrot fish we ever seen! Did we mention thee giant queen angels that you will see on almost every dive?

Shore diving means a minor drift but it is well worth the opportunity to sit and watch the crabs of all kinds, free swimming eels, and yellow rays that hangout just off shore. Evening and night shore dives are even cooler with octopus, squid, more eels, and lobster!

## Scuba Club Cozumel Dive Resort

This resort is set up for divers and designed with classical Mexican culture in mind. The entire resort and small and made almost entirely of concrete and terracotta. Everyone room porch has a bar to hang your gear and there are lockers available by each rinse station.

The food is very good with a buffet style breakfast that features both Mexican and American options. Lunch is scheduled with divers in mind, a self-serve salad bar so you can eat immediately after your dive, while waiting for your food to come out. There is always a special for dinner that is a traditional Mexican meal and alternative vegetarian option.
