

# Cozumel Dive Trip 13-20 November 2021

## The Best Cozumel Dive Trip Yet

We have come to love Cozumel drift diving and know what to expect but this trip was the best we have had yet. From gorgeous swim throughs and amazing night dives to classes with friends, we never stopped having fun all week.

There was many new experiences had and friendships made that will last a lifetime, Mexico wins our hearts over again!

## So Much Drift Diving

The very first morning in Cozumel, we were all in the water off shore and learning how to deal with the current. On the boat every day we jumped in to beautifully slow drifts that carried us past parrot fish, lobsters, crabs, beautiful corals and the ever amazing swim throughs. Did we mention how many of the famous Cozumel Splendid Toadfish we saw?

We had the challenging new experience on this trip of a ripping current on a night dive, it was a bit like a rollercoaster and we all learned something new. Different to spring time, the Spotted Eagle Rays were around this time, so large and majestic!

Our Divemaster Tony & Geyser did a fantastic job keeping us all safe and the Reef Star captain, Luis was amazing at maneuvering that boat in the perfect spot for diver pickups.

## Scuba Club Cozumel Dive Resort

We fell in love with this resort when we came in 2019 and it continues to impress. The influence of the Mexican culture in the architecture and food is one of our favorite things. Being well set up for divers with lockers and hanging areas just adds to the everything we love.

Because this place is so well set up for divers, we were able to teach Advanced Open Water, Drift Diver, Photography, and Night diver while there. It's the perfect place to move training in the winter!

The food remains very good with options for everybody and the staff is some of the best around. They are always sweet and accommodating, but also quick to learn who you are and what drinks/foods you like.
