

Manufacture of New Products

Recovered, pure plastic is used to manufacture an array of different products.

PRI Waste Plastic

Post-industrial plastic waste is reclassified as a 'by-product'. Over 1,000 MT of plastic by-product per month is refined at Greentech.

Circular Economy

100% reuse of plastic by-product.

Recycling

Our bespoke recovery process produces pure plastic, raw material, regrind flake.

Consumer Waste

Greentech and Terracycle are to offer a complete circular economy solution for recycling of consumer waste plastics, (e.g. Used Lens and Packaging)

Our Circular Economic process seeks to eliminate waste and traces our plastic by-product by the time it is extracted to the point it is recycled/reused.
