## WHAT IS THE GST?

When a demanding and challenging project requires steel structure and stainless steel decoration and fabrication, client turn to our unmatched capabilities to meet their complex design-built requirements....

as the recognized industry in the design, fabrication, engineering and installation / erection of structural steel throughout the kingdom of Saudi Arabia.

# Company Intro

" GST Saudi Established in 2000, as a well known enterprise in the field of metal, aluminum and wood works, service including with design, fabrication & installation. GST Saudi have successfully completed numerous projects on time and have built a recognizable name for itself in the construction industry. GST Saudi Having started as a distributor/trader of steel, stainless steel, aluminum materials including with maintenance services, GST has since expanded its service provision around the kingdom of Saudi Arabia includes with design, fabrication and installation services.

GST Saudi Founded on the concepts of hard work and excellence. GST Saudi has always been associated with premium quality and timely delivery. Our remarkable success over such a short time frame is the result of having dedicated and qualified staff, principally focused on client satisfaction. "

" The organization is composed of highly qualified and a dedicated team of engineers, professionals, managers and supervisors. Our team is fully capable of handling all types of metal supply, fabrication & installation related projects. Certain projects in the past consisted of civil works as part of the full scope. Therefore, we have a support group within our organization that specializes in civil contracting. "

" Our strength emanates from our distinct culture, strong and close relationship with our clients, employee's competence and loyalty, entrepreneurial and flexible management capability dynamism and commercial acumen.... "

# Company Intro

*Since our existence, GST/ GSC Saudi has grown in facilitating small, medium and large-sized enterprises, to multinational corporations as well as government entities. Since introducing construction services in 2000, GST/GSC Saudi has witnessed exponential growth, developing our company into a regional conglomerate. Here are some of the fields of our specialization;*

- *Design, Fabrication & Installation Steel, Stainless Steel, Aluminum, Glass & Wooden works.*
- *Supply of steel & stainless steel products.*
- *Supply of wooden products.*
- *Supply of aluminum products.*
- *Supply of tempered & laminated glass.*
- *Supply of Building Materials.*
- *Supply of electrical items.*
- *Industrial Maintenance Works*

## Abilities

We work as part of a professional team of interior designers, administrators, craftsmen and labor to produce the best product that satisfies our customers and to have a ranking in the Saudi market to be appropriate for our customers and appropriate for the ranking that we reached inside the Saudi market.

## Growth phases of the company

GST/GSC Saudi was established in the kingdom of Saudi Arabia in the year 2000 and we are committed to offer the highest class of products and the best services.

## Earning the trust

One of our key objectives is to earn the trust of the customer and we have earned this invaluable trust by offering the best types of materials with on time delivery.

*"our engineering - your solution"*

# COMPANY VISION | MISSION | VALUES

## VISION

- To be the leader in our industry and the major player in each of our market segments.
- To be the leading provider of quality construction and engineering services in the Middle East.

## MISSION

Our mission is to improve the quality of people's lives by enhancing the performance of their buildings, with products of the highest quality, technology and aesthetics.

- To meet the requirements and always strives to exceed the expectations of our Clients, Shareholders and Employees.
- To overcome the external and internal issues associated with the organization's Business and Scope of work, and to fulfill all the relevant requirements.
- To form long-term relationships of value with our clients and partners by using quality construction and engineering solutions and employing the best resources and latest techniques.
- providing long-term commitment and support to our clients.
- remaining at the cutting edge of manufacturing (fabrication and machining) services and combining this knowledge with the highest standards of engineering practice.
- achieving the highest level of innovation, skill and competence in our field.

## VALUES STATEMENT

**QUALITY** – we are committed to providing the highest quality service and products to our clients and to add value to their investment. Our end to end engineering processes and systems provide the means by which we can deliver our service and commitments.

**VALUE** – we treat our clients business as our business by providing value for money and obtaining the most competitive pricing.

**INTEGRITY** – we will be honest and open in all our dealings to ensure we obtain the trust of our clients.

**TEAMWORK** – we actively promote teamwork and expect each person to take responsibility for their work, and treat others with respect.

**INNOVATION** – we aspire to provide our clients with innovative and effective solutions in our production and provision of service.

***“ Working together successfully ”***

***“our engineering - your solution”***

## ABOUT US

---

### Opening a new market

Based on the company's vision that relies on development and spread, a new market was opened in Riyadh in the Kingdom of Saudi Arabia due to the continuous development of the Saudi market, and thus we opened our branch in the year 2008 AD to serve new customers and earn their trust.

### Building distinguished partnerships

To achieve the intended success, we had to build strong and influential partnerships with the key manufacturers of the international materials in the field of curtains and textiles and to be our partners in success and to offer a satisfied product to a customer that deserves it.

### Growth

Due to the constant growth in the market, we are keen to fulfill all requirements of the customers and to be always among the top in our field, we added new products that suit all requests and tastes of the different customers.

### Spread

In our attempt to build a strong trademark, we had to spread in all over the Kingdom through our agents in the various provinces of the Kingdom to achieve the future vision of the company during the next five years to earn the trust of the customers and build branches in the main provinces of the Kingdom so that we can open branches in all states of the Cooperation Council for the Arab States

## Services

### Assessment of needs

This is done through the technical requirements of the customer and his conception of what is required.

### Design of solutions

We try to translate the requirements of the customer into achievable solutions by offering suitable designs made by specialists to reach the best solutions in order to add a touch of beauty to the place.

### After sale service

Through our trust in the products that we offer and the materials that we use, the company offer a comprehensive warrantee on our products for long periods since we are keen to offer the best after sale service, where some of them has a five year warrantee and others have a ten year warrantee

# Chairman Msg.

***Since 2000 we have been a family owned and operated business committed to being a service provider of choice to owners, developers and clients throughout the region. Our first and foremost commitment is to our local community, using a local workforce. As we continued to experience service demands from the local community our small business expanded into what it is today, a 'multi-faceted' engineering company. From our original scope of repairs and maintenance we now provide a full range of engineering services.***

Today we operate from our original location offering a modern facility with a design and drafting department, fitting and machine shop, welding bays, fabrication and assembly areas, industrial blasting and painting, hydraulic hose manufacture, hydraulic component repairs, retail sales store and corporate services office.

We respond very quickly to the needs of our wider community and industries. Over the years we identified a need to stock materials and components for the manufacturing of our equipment. Today we operate a retail sales shop which offers modern spare parts, materials and equipment to our clients. This approach allows us to remain competitive in our market as we are able to maintain our stock levels through a streamlined ordering system resulting in timely production and service to our clients.

Our diverse client base now includes, coal handling and power generation industries, transport, construction and agricultural industries. We will continue to work with our local community and these industries and provide innovative and effective solutions in our production and provision of service.

## **Our staff**

Over the years we have built a stable workforce with a large number of our employees being 'long term employees'. Loyalty and commitment are values we promote amongst all our employees, from apprentices and trainees through to senior management. We support our local community by providing career opportunities for local people. Each year we offer two apprenticeships and or traineeships in the trades we require. I am proud of our ability to be able to offer these career opportunities for our young people. Today, a number of our qualified and experienced tradespeople in fact commenced employment with the Company as an apprentice tradesperson.

## **Our community**

We play an active role in our community, in particular providing financial and sponsorship support to local fundraising activities, sporting groups and community organisations.

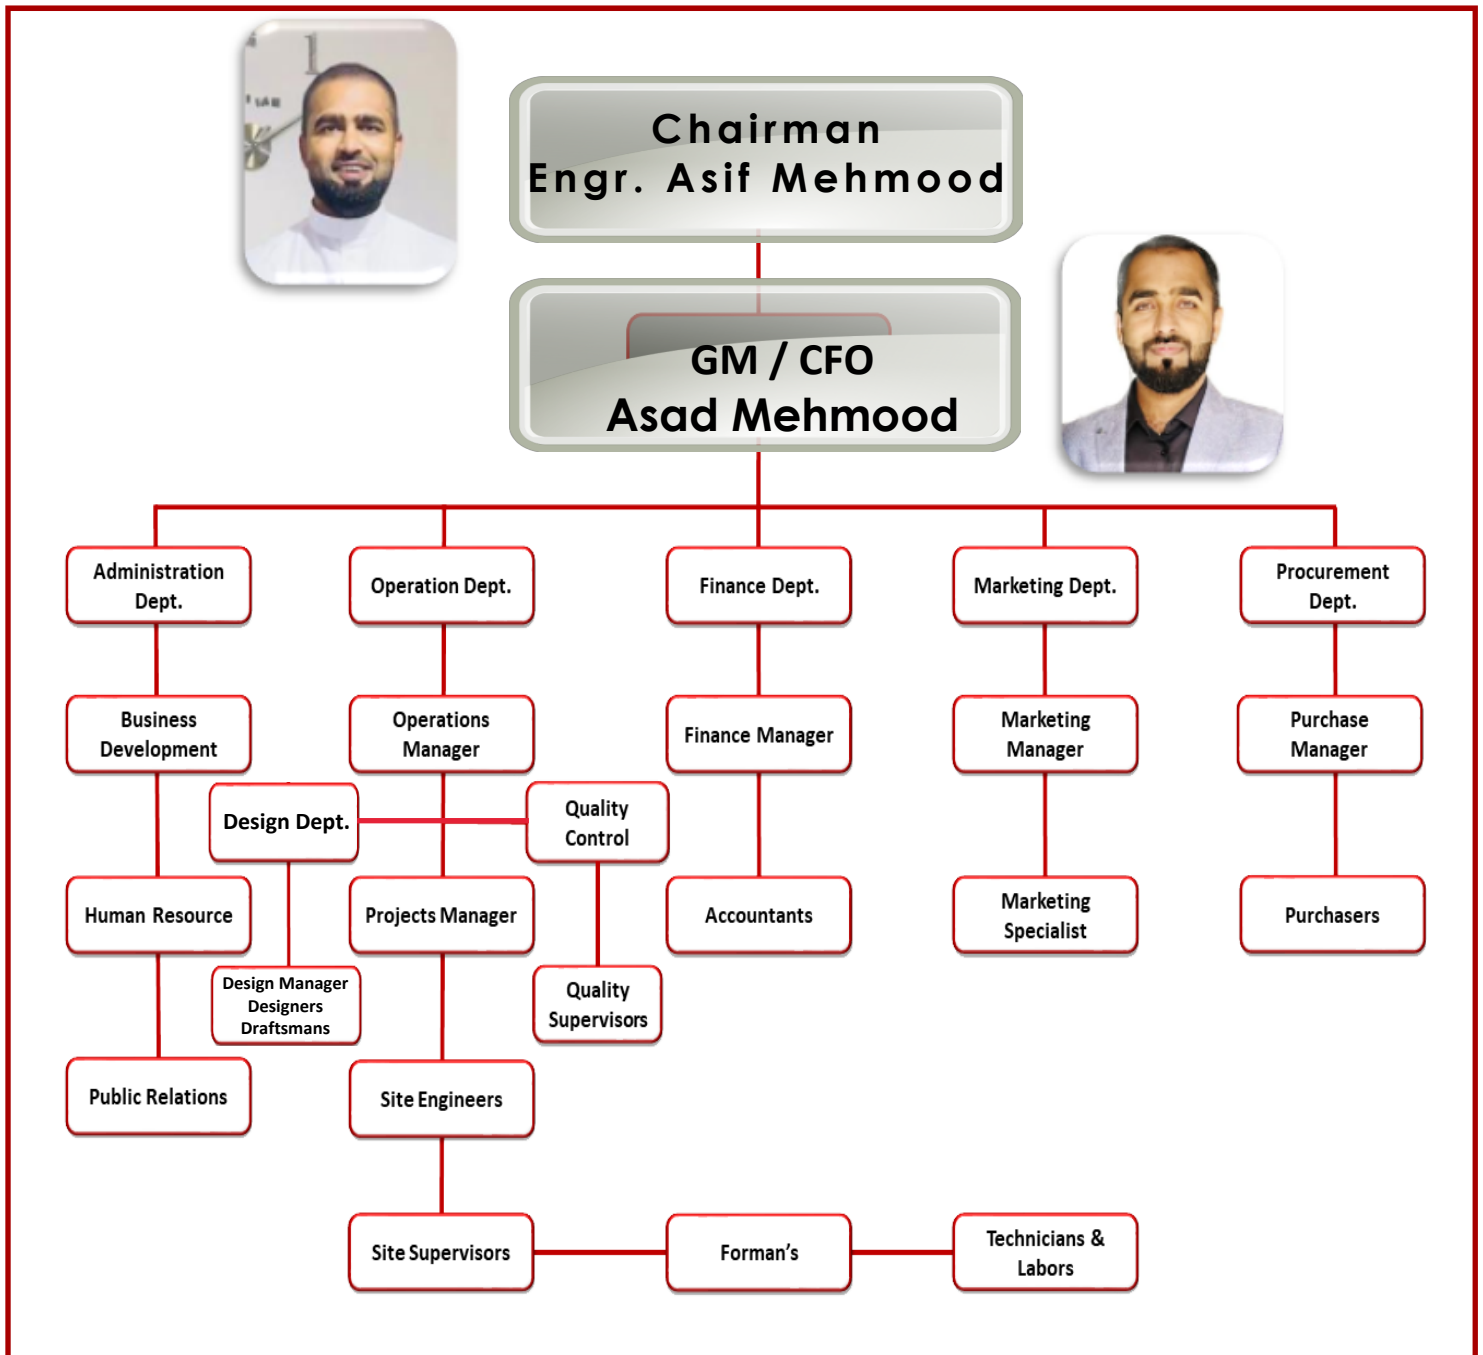

## **Our Key to Success.**

- ✓ Providing a professional quality service on time and on budget.
- ✓ Working honestly by developing a follow-up strategy to gauge performance and build trust with all our clients.
- ✓ Developing an end to end engineering product and services capability
- ✓ Working closely with our customers and providing a transparent line of communication.

# COMPLETED PROJECTS

**Client:** Al-Rashid Abetong  
**Project Title:** Al-Rashid Abetong –Riyadh Projects  
**Duration:** December 2020 to On Going  
**Project Value:** 1.2 Million (SAR)  
**Scope of Work:**

- Fabrication and Supply of Stockyard Panel Rack, Steel Handrails, SS Grating.
- Supply of Facade Brackets.
- Design, Fabrication, Supply & Installation of additional Steel Structure.
- Fabrication & Supply of Septic Tank.

**Client:** Unibeton  
**Project Title:** Unibeton Concrete Plant  
**Duration:** September 2020 to On Going.  
**Project Value:** 2.87 Million (SAR)  
**Scope of Work:**

- Design, Supply, Fabrication and installation of Steel Sheds, aggregate sheds and Hooper sheds
- Fabrication and Supply of U-Bracket, conveyor plates and shovel Hooper.
- Supply, Fabrication and installation of Metal Steel Canopy @ Entry Point.
- Fabrication, Supply & Installation of Storage Area Shed with additional platform & Grating.
- Fabrication, Supply & Installation of GI Handrail & Sliding Gate for Storage Shed.

**Client:** Shapoorji Pallonji Mideast LLC. Saudi Arabia  
**Project Title:** KAFD Area-1, C Headquarter Building & SABIC Main Building Project  
**Duration:** 2017 ~ 2022  
**Project Value:** 10.825 Million (SAR)  
**Scope of Work:**

- Supply, Fabrication and installation of Stainless Steel Handrail.
- Design, Fabrication and installation of Steel Stair Cases @ SABIC Jubail Main Building.
- Supply, Fabrication and installation of Metal Steel Canopy, Steel Handrail & Stainless Steel doors.
- Design, Fabrication, Supply & Installation of Heavy structural steel @ Roof Top @ SABIC Jubail.

**Client:** RCC-Riyadh  
**Project Title:** Riyadh Cement Company Plant-Riyadh  
**Duration:** KSA October 2016 to Jan 2021 (On Going)  
**Project Value:** Million (SAR)  
**Scope of Work:**

- Supply, Fabrication and installation of Steel Handrail & Grating
- Supply, Fabrication and installation of Aluminum Cladding Canopy front of Office Building.
- Supply, Fabrication and installation of Rolling Steel Shutters
  - Fabrication & Installation Steel Bridge with Platform.
  - Fabrication & Installation Steel Structure for Stock Yard.

*"our engineering - your solution"*

# COMPLETED PROJECTS

**Client:** MEFSO Plant \_ Al-Kharj.

**Duration:** December 2017 to 2019.

**Project Value:** 5.7 Million (SAR)

**Scope of Work:**

- Fabrication & Installation Steel Conveyor Bridge Platform.
- Fabrication, Supply & Installation of SS Balustrade @ Ramp Areas.
- Fabrication, Supply & Installation of Cage Ladder & HDG Grating.
- Fabrication, Supply & Installation of Boundary wall fence.
- Fabrication, Supply & Installation of Automatic Shutter Door.
- Fabrication Supply & Installation of Steel Structure work
- Fabrication, Supply & Installation of Steel Platform & GI Grating.

**Client:** ARASCO Plate \_ Al-Kharj.

**Duration:** March 2020 to January 2021 (On Going).

**Project Value:** 4.75 Millon (SAR).

**Scope of Work:**

- Supply, Fabrication and installation of Stainless Steel Linear Drain & Grating.
- Supply, Fabrication and installation of SS Staircase Balustrade Handrails.
- Fabrication, Supply & Installation of Boundary wall fence & Sliding Gate with logo
- Supply of HDG Grating.

**Client:** SaudiCeramics,KSA

**Duration:** November, 2017 to August, 2018 (Completed)

**Project Value:** 1.57 Million (SAR)

**Scope of Work:**

- Supply, Fabrication and installation of Stainless Steel Doors.
- Supply, Fabrication and installation of Stainless Steel Handrail.
- Supply, Fabrication and installation of GI Guardrail & Grating.

**Client:** Saudi Airline Catering, Riyadh.

**Project Title:** Supply & Installation of SS grating, Steel Racks & Doors.

**Duration:** Jan, 2019 to Jan, 2021 (Completed)

**Project Value:** 2.22 Million (SAR)

**Scope of Work:**

- Supply, Fabrication and installation of SS 316 Grating @ Kitchen area.
- Supply & Installation of Metal Mesh, Linear grating, Stainless steel doors & Handrails.
- Supply, Fabrication & Installation of SS Balustrade.
- Fabrication, Supply & Installation of Automatic Shutter Door.

# Quality Assurance Management Systems

## QUALITY ASSURANCE

### Training of employees on quality aspects

Paying close attention to the importance of the human factor in achieving high quality, we define for each position a specific quality control directive which must be followed carefully. Additionally, group trainings are carried out regularly regarding new products, as well as re-trainings for existing ones.

It is our philosophy to place every employee in the position of the quality controller and enhance personal responsibility for efficient quality control.

In addition, we use a digital information system, through which any acquired experience in production can be recalled digitally, whenever a particular product is manufactured. Finally, special quality control executives, through their continuous presence at various production stages, educate and retrain our people on a permanent basis.

#### QUALITY MANAGEMENT SYSTEM

According to the international standard ISO 9001-2015 by INTERCERT By implementing an advanced Quality Management System we ensure the high quality of our products and services in order to have satisfied and dedicated customers. Specifically, Metal & Aluminum applies its Quality Management System regarding the design, Fabrication & Installation of architectural aluminum , glass & Metal Works.

#### FACTORY PRODUCTION QUALITY CONTROL

At GST Saudi Co. we fully understand the significance of Quality in our work. We have a firm belief that superior quality is the one and only way by which we can sustain and enjoy long term relations with our clients.

Provision of quality is the only approach by which a firm becomes a market leader of their industry. Therefore, we have a strict policy in place that leaves no stones unturned when it comes to delivering extra ordinary class of work.

#### POWDER COATING QUALITY

The quality control and certification of powder coating for aluminum & metal products is determined by the specifications of the AAMA Standards.

#### ENVIRONMENTAL MANAGEMENT SYSTEM

According to the international ISO 14001-2015 by INTERCERT. The certificate ensures the harmonious coexistence of aluminum and metal activities with the natural environment. aluminum & metal has established and applied from 2002 a certified Environmental Management System in accordance to the international standard ISO 14001:1996 regarding the extrusion of aluminum, Metal, powder coating, wood imitation surface treatment and the production of thermally insulated profiles.

The following are the main points that we use in order to assess and maintain quality of work.

- Overall satisfaction of our customers
- Time/Quality/Cost/Service
- Fulfillment of the contractual requirements
- Quality systems should meet international set standards
- Ensure that only the material specified by the client is used
- Improvement of quality through innovative technology
- Implementation of "Prevention before correction" strategy. This reduces and limits the overall probability of mistakes.

**C.E.O**

*"our engineering - your solution"*

# HSE Objectives:

- The systematic identification of risks to health and safety, and implementation of measures to control risk to an acceptable level through the Hazards and Effects Management Process
- In consultation with employees, periodically setting and publishing specific health and safety targets. Progress towards achieving the targets will be continuously monitored by the Senior Management Team.
- Providing appropriate financial and physical resources to implement this policy.
- Recognizing that the management of health and safety is a prime responsibility of line management. The company depends on the co-operation, support and commitment of all employees to achieve the objectives of this policy, and compliance with the policy is a condition of employment.
- Devote sufficient resource to ensure environmentally friendly performance.
- **In order to encourage the full commitment of employees, the company will ensure that:**
  - a. Employees or their representatives are involved and consulted on matters of health and safety.
  - b. All employees at all levels are aware of their general and specific responsibilities for health and safety.
  - c. All employees receive appropriate information and training and are competent to carry out their duties and responsibilities.
  - d. This policy and its objectives are communicated, understood, implemented and maintained at all levels in the organization. This will be achieved by periodic review and auditing of this system to ensure its adequacy and effectiveness.
  - e. The right of any employee to intervene in unsafe situations is upheld and encouraged without detriment to the employee.

# Health, Safety & Environment Policy

**GST / QS is a multidisciplinary construction company based in KSA**

Protecting employees and third parties from ill health, injury or harm together with the promotion of employee well-being and avoidance of damage to the environment is an essential part of GST/QS operation philosophy.

The Senior Management Team is committed to reducing Health, Safety and Environment (HSE) risks to a level which is As Low as Reasonably Practicable (ALARP) and maintain a high standard of HSE performance throughout all company operations. Compliance with KSA& the Region Law and recognized industry best practice is the minimum acceptable standard, with continuous, cost-effective improvement in our performance.

## Environmental and Social Management System Manual

### Table of Contents

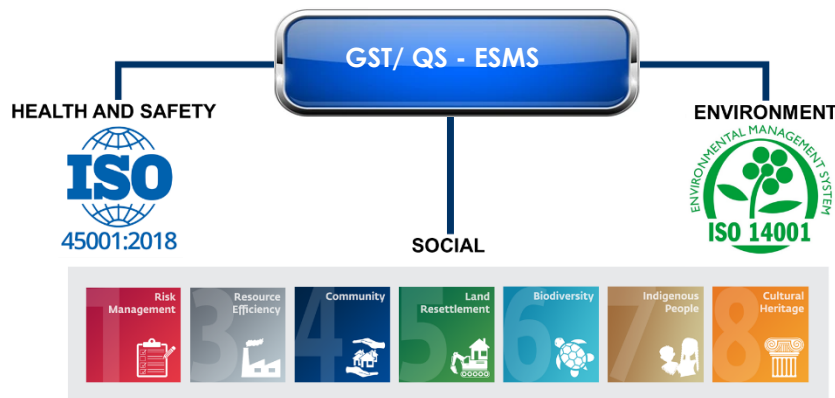

1.	INTRODUCTION
1.1	PURPOSE
1.2	SCOPE AND BOUNDARY
2.	ENVIRONMENTAL AND SOCIAL POLICY
3.	ESMS FRAMEWORK

*"our engineering - your solution"*

# Introduction

## 1.1 PURPOSE

In action to pursue the corporate vision of a major sustainability Thai energy company with full commitment towards environment protection and social development, this Environmental and Social Management System (ESMS) manual has been established. The manual sets out management requirements for environmental, occupational health, safety and social (ES) issues present throughout project's life cycle. In addition to adhering with international standards such as International Organization for Standardisation (ISO) 14001 Environmental Management System, ISO 45001 Occupational Health and Safety as well as the World Bank International Financial Corporation (IFC) Performance Standards as illustrated in Figure 1-1 below.

**Figure 1-1 Scope of ESMS**

Primarily, the manual defines a risk-based systematic approach in order to ensure that business risks are minimized while also creating opportunities. Controls, mitigation measures, monitoring of results, inspecting and reviewing are additional processes captured for excellent performance. Whereby ultimately, aiding the prevention of project delays, meeting requirements which GST/QS is obliged to and earning the social license to operate.

The ESMS manual is structured chronologically according to the project stage- project development, construction, operation and asset retirement respectively. Through which each requirement details the intention and steps necessary.

## 1.2 SCOPE AND BOUNDARY

This Environmental and Social Management System takes into account the impact on the environment, occupation health and safety of workforce as well as the community and social issues of the public. Activities and services addressed under the scope are those provided at sites in which GST/QS has controlling power. This includes activities and services conducted in the following project phases:

- ; Feasibility studies      ■
- ; Project design      ■
- ; Due-diligence, mergers and acquisitions      ■
- ; Project development and construction      ■
- ; Operations, business facilities and maintenance      ■
- ; Asset retirement      ■
- External providers (i.e. key business partner, suppliers, and contractors at GST/QS site)      ■

*"our engineering - your solution"*

# ENVIRONMENTAL AND SOCIAL POLICY

ES Policy is established, endorse, communicated and made available to all employees. The policy shall be reviewed annually and modified to incorporate changes as arising from change and progress of the Company business.

## Environmental and Social Policy

*GST/QS is committed to operating the power business with the highest responsibility towards society, community and environment ensuring a sustainable business operation.*

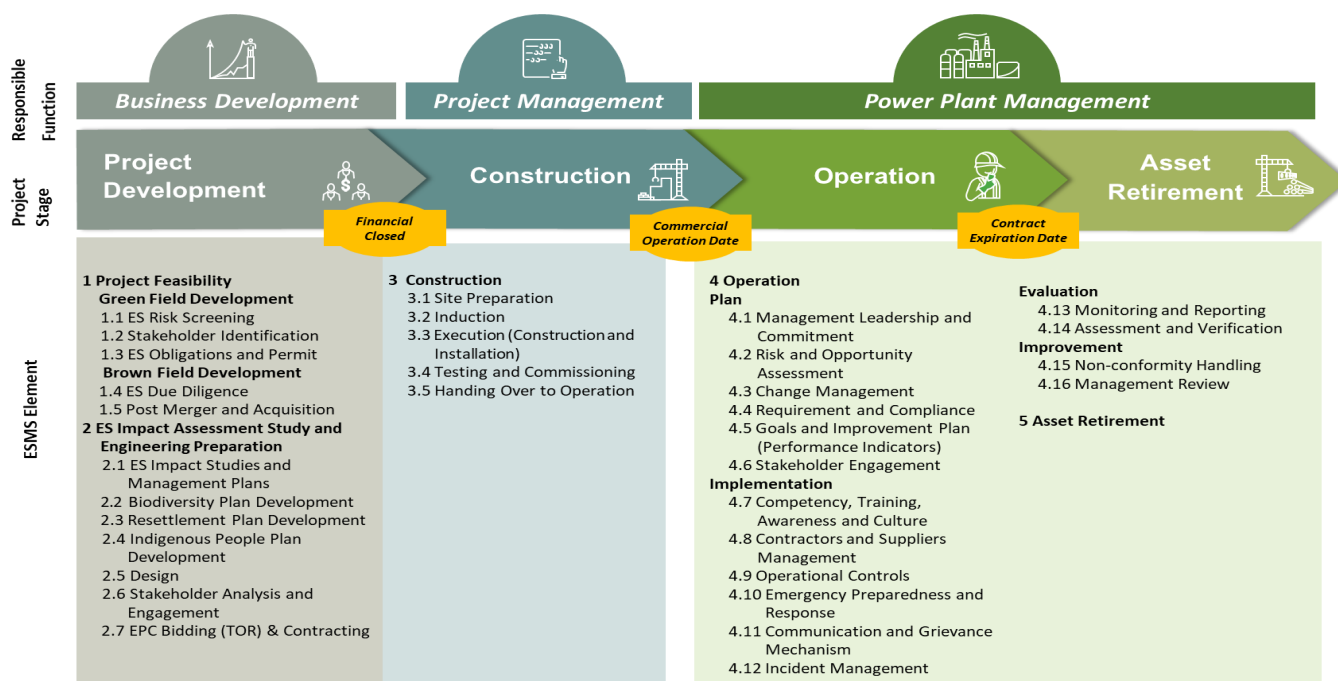

*Therefore, GST/QS is committed to:*

- *Comply with environmental and social regulatory requirements of the host country;*
- *Control, protect and mitigate environmental impacts imposed on the ecosystem and biodiversity. While continuously controlling emissions at power source to manage greenhouse gas in our operation which effects the community and stakeholders;*
- *Communicate environmental and social policy, strategy and direction to all employees and relevant stakeholders;*
- *Encourage participation among business partners, suppliers and contractors minimize environmental, health and safety and community issues from operation and transportation activities;*
- *Encourage and develop innovation for sustainable environment, whereby including programmes for community development.*
- *Ensure appropriate allocation of resources for managing site's environmental, social and occupational health and safety aspects;*
- *Support knowledge/ experience sharing between facilities and promote good environmental and social culture and behaviour throughout the organization; and*
- *Regularly review the environmental and social performance and publically report achievements to encourage continuous improvement.*

*GST/QS understands that an effective environmental and social management can directly impact the overall performance of business operation. Therefore, GST would like all employees, operators, contractors and other business partners to cooperate in a harmonious coexistence with local communities and the environment.*

# ESMS Framework

GST/QS ESMS Frameworks overarching ES requirements integrated into each of the project phases from project development to asset retirement. This is to ensure that GST/QS considers, reviews, assesses and mitigates potential ES impacts from all business activities. ESMS framework is illustrated in Figure 3-1 below

**Figure 3-1 GST/QS ESMS Framework**

ES indicators related to each phase are summarized below, but not limited to, as follows.

- ES Indicators for Business Development phase
  - Key ES risks and opportunities influence to business decision identified
  - Key stakeholders' views and interests considered in the scoping of ES impact assessment study
  - ES licenses/ permits and their timelines incorporated into an overall project master plan
  - Required ES Studies e.g. EIA/IEE/ESIA approved against the overall project master plan
- ES Indicators for the Construction phase
  - Number of formal/written complaints unaddressed
  - Number of complaints impacting the project schedule
  - Review of detailed design as per project ES specifications completed
  - ES Management Plans integrated into EPC contractor's Management Plan
  - ES performance of EPC contractors during construction activities
