

A Note to High Schools:

The *Careers That Work!* Scholarship program provides tuition assistance for high school graduates pursuing education at participating career colleges.

We appreciate your commitment to guide each student toward appropriate postsecondary education and thank you for helping them reach their career goals. The scholarship program makes available five \$1000 tuition scholarships (\$500 tuition scholarships for programs less than six months in length) to all public and private high schools in Idaho, Oregon, and Washington.

The high school identifies the student that receives the scholarship. The recipients must be accepted by the college to validate the scholarship. Scholarships are non-transferable and valid only for attendance at the colleges listed in this brochure.

For more information and to award scholarships, see the scholarship page at careerstates.org/ctw-scholarship
