

Ideal printing size is 11 x 14 paper for 12 inch dolls

To begin, cut around the black line. Then once you have your two magazine strips cut out, fold inward on the green marks and outward on the red marks. Once folded, unfold the strips and cut off the top and bottom excess paper. This was only there to know where to fold. Match up the tabs that say “A” and “B” with each other. These pages will be where you are gluing the whole thing together. With your glue stick, glue in between the pages (all white parts of the paper). While gluing, glue the sides of the strips marked “A” together as well as the pages marked “B” with their corresponding letter. Cut off the lettered tabs. Finally, you should have yourself your very own issue of Swanky Magazine! Please enjoy and make sure to share your dolls enjoying their read on socials!
