About Us.

Introduction

Indomation is built on a strong base of Product Design, Plastic R&D and Mould Making. Known for it's High Precision Mold making around the world, we established India's First Make in India initiative in the conveying and automation Industry.

We manufacture the most superior quality of products that last for decades with minimal maintenance cost. Our expertise has helped build the automation Industry in India and supplied to over 100's of satisfied customers through our dealing channels.

Our goal has always been to help Indian industries to be self- reliant, which in turn helps boost the economy and efficiency. Our Products are substitute to all the world leading brands, that helps the customers maintain their Machinery in the most minimal time and cost.

Mission, Vision & Core Values.

MISSION

To empower individuals and businesses by providing innovative solutions that enhance productivity, foster collaboration, and drive sustainable growth, while prioritizing integrity and community impact.

VISION

To be the leading provider of premium quality conveying solutions for all industries, driving innovation and self-reliance while empowering the Make in India initiative for a prosperous and sustainable future.

CORE VALUES

- **Collaboration:** We believe in the power of teamwork and foster an inclusive environment where diverse perspectives are valued.
- **Accountability:** We take responsibility for our actions and commitments, ensuring transparency and trust in our relationships.
- **Integrity:** We act with honesty and uphold strong ethical principles in all our actions.
- **Innovation:** We embrace creativity and encourage new ideas to drive progress and stay ahead in our industry.

Our Journey

1992

Established a Tool Room Manufacturing unit in Pune to serve varied industries. developed moulds for Automotive, Telecom, FMCG & Press Tool.

2000

Developed and supplied Moulds to customers such as Tata Automotive, Sansui, Bharat Electronics, Manikchand, and many others.

2003

Expansion of facility in Singapore.

2006

Through extensive research and knowledge collected from extensive exposure of foreign businesses with a vision of Make In India. Launched India's 1st Brand- "INEXCO", which introduced Plastic Modular Belts and Chains to the Indian market.

2008

The only Modular Belts manufacturer to represent an Indian Brand in the Germany Expo.

2016

Persistent development lead to collection of more than 65 varieties of Belts and Chains, and proudly supplied to esteemed customers such as Patanjali, Ceat Tyres, Gadre Marine, and many others through traders.

2018

Rebranded as "INDOMATION " to give way to the new generation, aimed to focus on expanding to new verticals for business.

2022

New development of Ready to Dispatch conveyors focused to serve Conveyors Manufacturers, providing Quick Delivery, Easy to Install ant minimal Transport cost.

Facility & Infrastructure

Facility Area :- 3000 sq.ft

Location- Sinhagad Road, Pune

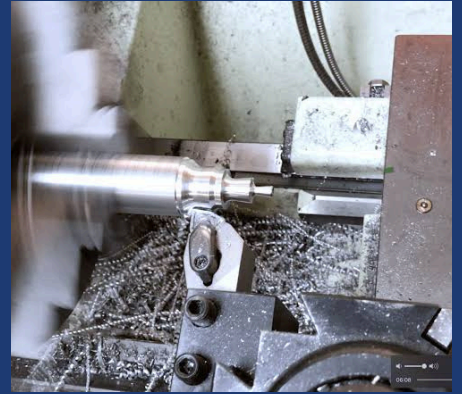

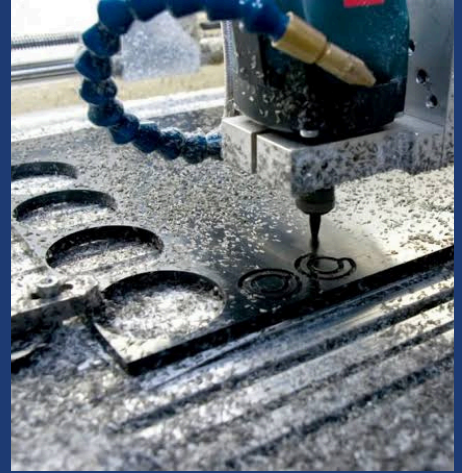

Tool Room : 1000sq.ft

List of Machinery:

- Leblond Makino VMC
- Leblond Makino VMC
- Hasegawa VMC
- Bridgeport VMC
- Electronica EDM
- Surface Grinding
- Injection Moulding 150T
- Radial Drilling Machine

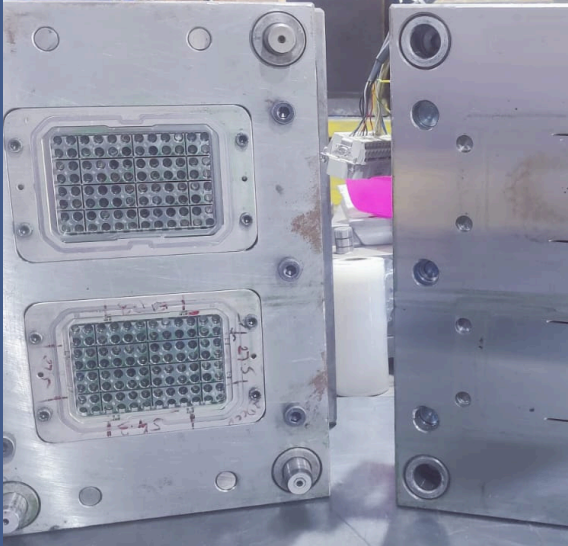

Facility & Infrastructure

Conveyor & Belt Assembly Facility:-

- Modular Belt Assembly Area
- Conveyor Assembly Area
- Plastic Parts Routing
- Injection Molding Machine 150T
- CNC Lathe
- Traub Machine
- Hydraulic Press 100T

Our Products

TOOL & DIE MAKING

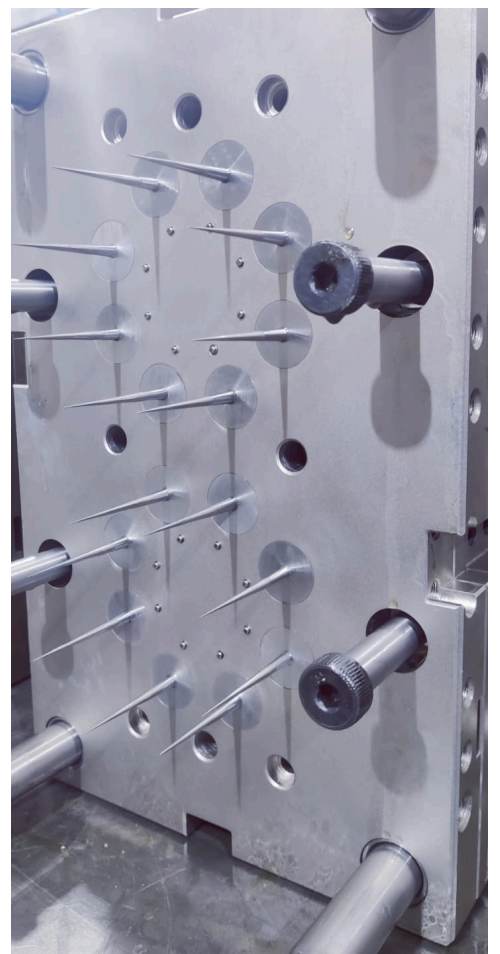

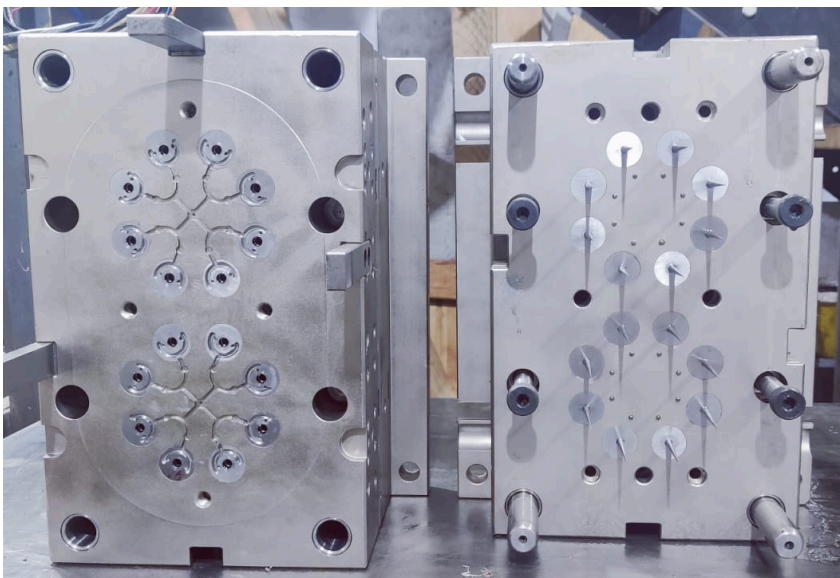

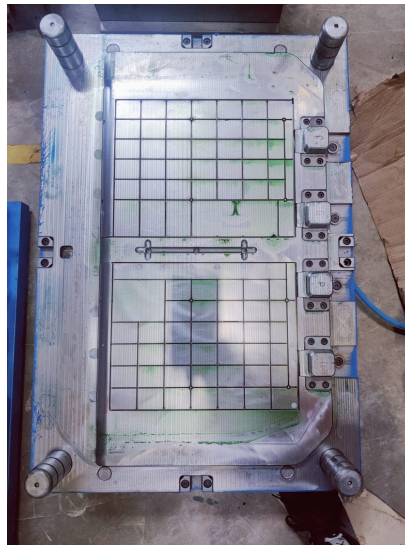

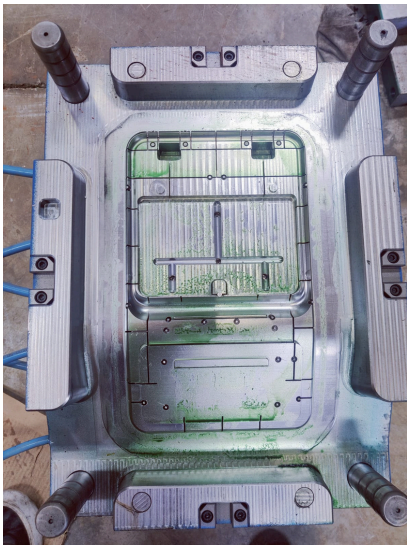

**MODULAR PLASTIC
BELTS**

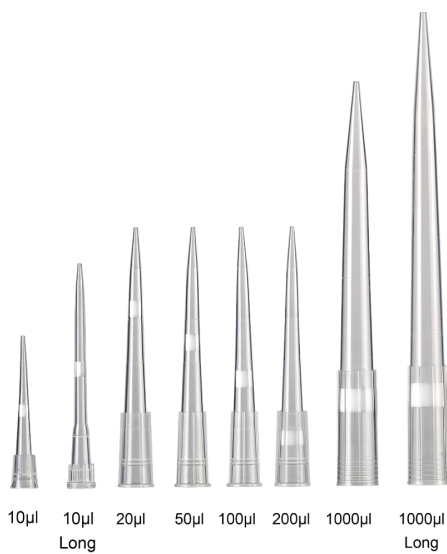

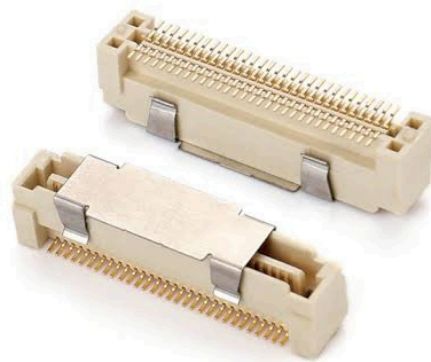

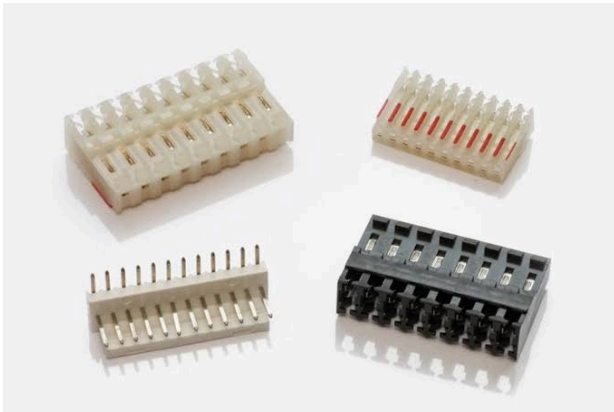

MODULAR CONVEYORS

Tool & Die Making

In house state of the art mould making facility, delivering High Precision Injection molds since 32 years. We have developed many of critical components used around the world even at the present day & age. Supplying molds commercially all around the world. Components such as Telecom Connectors, Weighing Scales, Automotive Components, etc and the most recent Pharmaceutical Components Sets us apart from any of the mold makers around the globe.

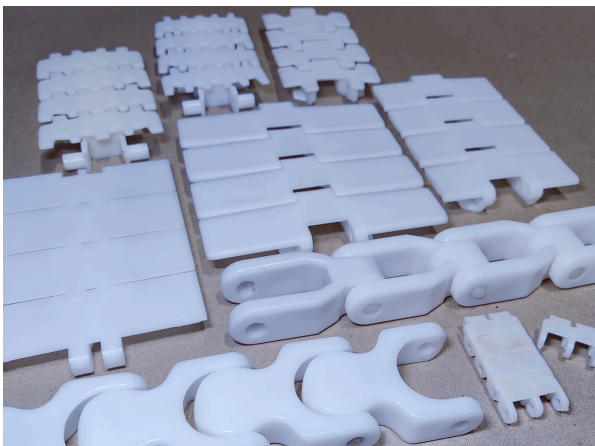

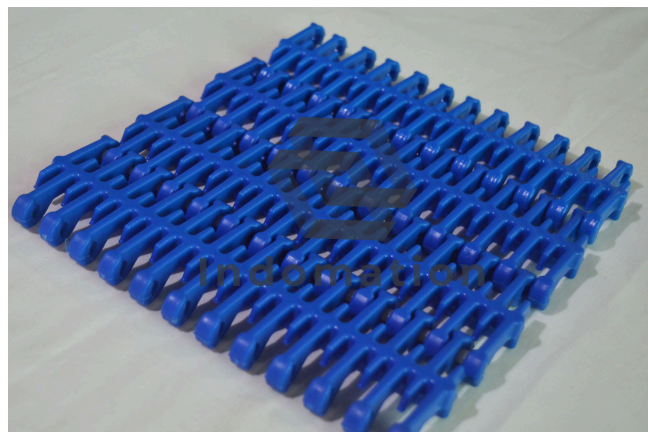

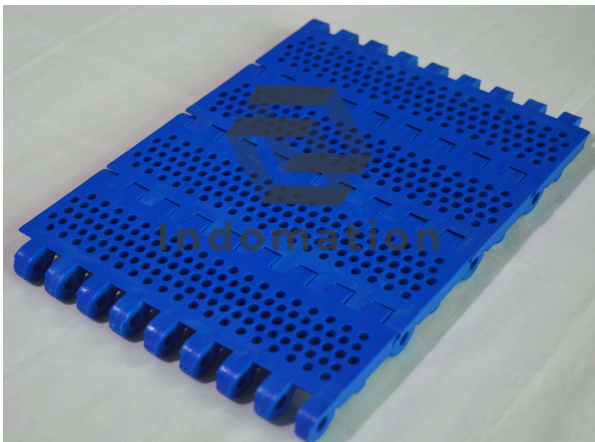

High Precision Components Delivered

Modular Plastic Belts

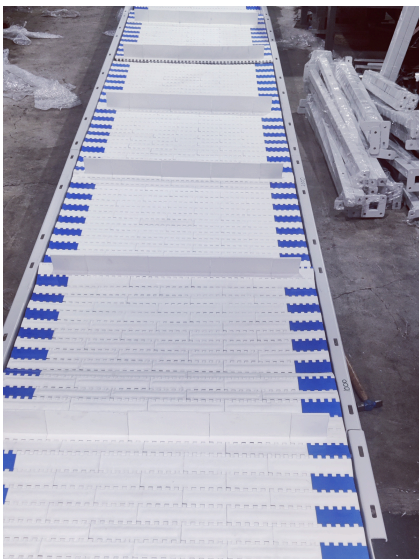

As the world's needs changed over the years, we studied the swing of growth and economy in the field of conveying solutions to the growing automation in the industries and introduced India's First Modular Belt Brand, "**INEXCO**", in the year 2006.

After supplying Belts to a wide range of industries for 18 years, Inexco was rebranded and Indomation was born. **We provide Belts to convey products weighing 10grams to 10000 grams per square meter.**

Modular Conveyors

Being the first Modular Belt Brand in India, we have helped our customers develop and incorporate the use of Modular Belts in their Conveyor designs, and since been supplying Modular Conveyors as a ready to install solution to all Conveyor Manufacturers.

Types of Conveyors:

- Straight Conveyors
- Inclined Conveyors
- Radial Conveyors
- Buffer Conveyors
- Chain Conveyors
- Z Type Conveyors
