CSR PROJECT COMPLETION REPORT

Utilisation of CSR Funds from M/s Epiroc Mining India Ltd.

To,

President/MD/GM/Trustee/CSRO

M/s Epiroc Mining India Pvt. Ltd.

Epiroc Charitable Foundation

1. Name of the Project:

Installation of Water Softener Plant and Solar Rooftop System

2. Name of the CSR Partner:

M/s Epiroc Mining India Pvt. Ltd.

3. Name of the Implementing Agency:

Navjeevan Sanstha, Nagpur

4. Project Location:

Dr. T.S. Wilkinson Memorial High School and Navjeevan Sanstha Boys Hostel

5. Period of Implementation:

October, 2024 and May, 2025

6. Objectives of the Project:

- To ensure access to clean and safe water for hostel and school children and staff.
 - To reduce the dependency on grid electricity for hostel operations by shifting to solar energy.
 - To promote the use of renewable energy and enhance sustainability.
 - To mitigate health and infrastructural issues arising from hard water usage.
-

7. Project Description and Outcome:

A. Installation of Water Softener Plant

The water supplied to Navjeevan Sanstha's school and hostel premises is drawn from borewells located within the compound. However, the groundwater in this region is extremely hard and unsuitable for regular human consumption and domestic use. Frequent complaints of skin-related ailments such as rashes and itching were observed among children, in addition to corrosion of pipelines and sanitary fittings.

With the CSR support from M/s Epiroc Mining India Ltd., a high-capacity **Water Softener Plant** has been installed. The system now provides softened and safer water to:

- **100+ hostel children**
- **300+ school children and staff**

Impact:

- Improved health and hygiene
 - Reduced pipeline maintenance and damage
 - Enhanced quality of life for the children and staff
-

B. Installation of Solar Rooftop System

A Solar Rooftop Power System has been installed to serve the **boys' hostel**, reducing the dependency on conventional electricity and bringing down monthly electricity expenses.

Impact:

- Stable power supply for lighting and essential hostel needs

- Reduction in electricity bills, enabling reallocation of funds to welfare activities
- Contribution to environmental sustainability by adopting clean energy

8. Fund Utilisation Summary:

Component	Amount Spent (INR)	Remarks
Water Softener Plant	Rs. 9,29,795/-	Fully installed and operational
Solar Rooftop Installation	Rs. 4,89,681/-	Fully functional
Total CSR Funds Utilised		Rs. 14,19,476/-

9. Photographic Evidence:

Navjeevan Sanstha sincerely thanks **M/s Epiroc Mining India Ltd.** for their kind and timely support through their CSR program. Your help has made a big difference by solving two major problems at our institution — providing clean water and using solar energy for our hostel.

Thanks to your support, we have installed a **Water Softener Plant**, which has greatly improved the health and comfort of our hostel children, school children, and staff. Earlier, the water was very hard and caused issues like skin rashes, itching, and damage to our pipelines. Now, with soft water available, everyone can safely use the water for drinking, bathing, and other daily needs.

We have also installed a **Solar Rooftop System** at the boys' hostel. This has reduced our electricity bills and helped us move toward using clean, renewable energy. It ensures that the hostel has regular power and creates a better and greener environment for the children.

This project shows how meaningful CSR support can bring real and lasting change to the lives of those in need. **M/s Epiroc Mining India Ltd.** has shown great responsibility by supporting projects that directly help people and the environment.

We are truly grateful for your support and hope to continue working together in the future for the benefit of our children and the community. On behalf of all the children, staff, and members of Navjeevan Sanstha, we thank you with all our hearts.

For Navjeevan Sanstha
