

## OVERVIEW

The Cygnus Cyclone 30 FC (Forward Control) has a wheelhouse with the bridge windows inclined to the forward. The wheelhouse gives good shelter for four persons. The top of the wheelhouse can be extended to divert sprays and give additional shelter from the rain. The length of the overhang can be varied to customers needs.

With the FC wheelhouse, there is huge deck space available to fit fishing gear, providing space for angling and or diving operations. This gives us the opportunity to satisfy the needs of both the professional seaman and the recreational sailor. The Cygnus Cyclone 30 FC can be delivered at any stage of completion.

## TECHNICAL DATA FOR THE 30 FOOT VERSION

### Dimensions

### Metric

Length Overall

9.15m

Beam

3.35m

Draft

0.9m

Air draft (Waterline to top of mast)

3.00 m

Displacement \*

3.5 tons –5.5 tons

Berths (Depending engine weight/interior layout)

2- 4 or 6

### Performance

### Metric

Engine recommendation (Single)

330 - 400 HP / 246 – 298 KW

Engine recommendation (Twin)

2 x 225-300 HP / 2 x 168 - 224 KW

Top Speed Range

55 km/h – 74 km/h

Fuel consumption (25 knots)

2.20 l/nm

Maximum cruising range/time

180 nm – 454 nm

Maximum load

1500 kg

CE category

B-offshore (CE)
