

In 2019, A-Rod and Marco created a team in the GHBL in an effort to help find new players for the BVB team. As a direct result of that initiative, 2 players were found that started contributing right away in 2020 to the BVB Team; Yuniel Rodriguez and Juan Herrera.

Juan has consistently shown himself to be a top flight player and outfielder patrolling Left field. 2023 was another great year for Juan but one that saw him play in fewer games due to other commitments and work.

In 2024, Juan got a significant amount of time on the mound and started to trust himself when he pitched. At times, he was very effective, at others he was wild (which also can be effective). On the mound, he just needs to cut down the walks and he will be far better. Offensively and in the field, Juan is always a force as he led the team in doubles, triples and tied for the team lead in runs scored.

2025 saw Juan play fewer games as he had work commitments that kept him off the field for us more then in previous years. That did not stop him from being among our top hitters once again as his stats below can attest to. He did pitch less but did a lot of bullpen work and heading into 2026. I feel he may just get a chance to at least be an effective reliever on the mound for us when push comes to shove.
