Help Shelton plug his guitar into the amplifier so he can play his favorite songs like "The Ocean" and "Rock Lobster."

Allow me to explain...

Chuck Daniels: Charlie Daniels was one of the most famous fiddle players in the world, and 'Chuck' is a common nickname for 'Charlie'. Male fiddler crabs, like Shelton, have one arm much larger than the other arm.

Drumming: Since crabs can't talk, they will bang their pincers against the sand to communicate. That kind of looks like they're playing drums.

"He digs hard rocks, but he don't dig jazz."

Crabs like to hide in dark places behind rocks where they can rest and hide from animals that want to eat them. **Hard Rock** and **Jazz** are two types of musical styles.

iPod: Before smartphones and music apps were invented, Apple created a portable media player called the iPod: "a 5 GB hard drive that put 1,000 songs in your pocket."

Phish: A popular American 'jam band' named after their drummer, Jon Fishman. Shelton's favorite song by Phish is "Sand."
