GETTING ENTREPRENEURIAL (aspiring entrepreneurs)

70% of students and workers dream of someday running their own business -- to achieve a greater sense of fulfillment in their work and to assure their family's economic prosperity. Our **Getting Entrepreneurial** seminar gives participants the secrets of the world's great entrepreneurs, plus the fourteen essential application exercises to get them started. The seminar is self-paced with nearly one third of the time spent on Application planning. The program has two goals: each aspiring entrepreneur will learn the entrepreneurial basics and will finish up with his/her own action plan for starting their own business! An expertly designed Business Plan is included for post-seminar use as needed – and on-going start-up mentoring will also be available.

THE ENTREPRENEURIAL ORGANIZATION (companies / business associations)

The Entrepreneurial Organization seminar's core message is that "creating and growing" a business is very different from "managing" a business. The program offers participants a unique grounding in high-growth entrepreneurial practices – and a roadmap for creating a more entrepreneurial organization. The full seminar is designed for teams of 5 to 15 managers, with group collaboration sessions devoted to Application planning. The session has two goals: that participants learn the entrepreneurial basics which propel all high growth enterprise and leave with a plan for instilling those basics in their own departments and across their organization.

CREATING ENTREPRENEURIAL ECONOMIES (governments)

The driving force of every successful economy in the world is entrepreneurship. The 'CEE' program describes how governments can create more entrepreneurial economies by encouraging, training and supporting large numbers of new entrepreneurs each year. The session details our four phase project approach to spur job creation, business start-ups, and economic development. It concludes with Applications to determine the key actions required to create a self-sustaining and job creating entrepreneurial economy. When entrepreneurship training is required, we then create a '**Getting Entrepreneurial**' training project with the government agency.
