UV STERILIZER SYSTEM

**Safeway  
Water®**

WATER • HEALTH • LIFE

# IN AN EMERGENCY SITUATION

# BOIL WATER ADVISORY

## TAP WATER MAY NOT BE

## SAFE TO DRINK OR USE

State and local water system agencies, issue water advisories when they have concerns about water contamination. It is often abrupt and disruptive when an emergency situation arises.

Losing your ability to safely use your water is even more detrimental to your everyday lifestyle. Planning ahead of time with cases of water on stand-by may not be enough in an emergency situation involving water supply failure. Water for bathing, cooking, and laundry may not be safe for days or weeks while you source a safe water supply.

### **BOIL WATER ADVISORY**

Tells communities to boil water before use.

### **DO NOT DRINK ADVISORY**

Tells communities to use a different water source for drinking or cooking.

### **DO NOT USE ADVISORY**

Warns customers not to use tap water for any purpose, including bathing.

#### **Chlorine Resistant Bacteria:**

*Giardia*, *cryptosporidium* are hard shell pathogens that are resistant to chlorine.

#### **Water Main Repair:**

Water main breaks often occur after system leaks erode the ground around the pipe.

**you have OPTIONS**

# PURELIGHT<sup>TM</sup> UV WATER TREATMENT

## PART OF YOUR PERSONAL WATER QUALITY RESPONSIBILITY

UV Water Treatment is an outstanding way to meet your water purification needs. UV has proven to be one of the most reliable, quick, and cost-effective methods for sanitizing your water.

### A UV STERILIZER

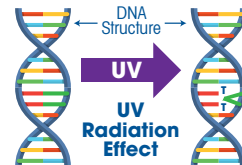

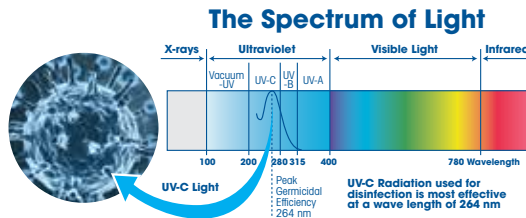

The non chemical type sterilization is the ideal way to complete your water system, protecting your family from chlorine resistant bacteria and the unknown water quality that comes from random boil water alerts.

### UV TREATS BACTERIA, VIRUSES, AND CYSTS

### HOW DOES IT WORK?

UV radiation disrupts DNA and RNA polymerase at low doses while breaking down large organic molecules into smaller ionized components. Treatment of water with UV C light is used to photo oxidize organic impurities and/or inactivate micro organisms.

UV light penetrates the cell wall, disrupting the structure of their DNA, effectively preventing replication or reproduction.

- ✓ Non chemical alternative type of disinfection
- ✓ Ideal for City Water application
- ✓ Low power consumption
- ✓ Clean, safe, and reliable
- ✓ 24/7 protection against waterborne bacteria, viruses, and cysts

Your water safety and health concerns may not be solved by one treatment solution. Our comprehensive and complete water system designed for your home will go a long way in providing years of benefits.

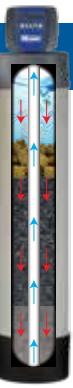

### B COMPLETE HOME FILTER

**SafetySORB<sup>+</sup>**  
WATER FILTRATION SYSTEM *Plus*

Reduces Chlorine, THM and other disinfection By Products through out your home.

Benefits your:

- ✓ Plumbing
- ✓ Water fixtures
- ✓ Toilets
- ✓ Skin
- ✓ Hair
- ✓ Health

### C COMPLETE HOME SOFTENER

**PREMIUM Soft WATER**

Eliminates and Reduces the effects of hard water scale through out your entire home.

- ✓ Plumbing
- ✓ Water fixtures
- ✓ Toilets
- ✓ Skin
- ✓ Hair
- ✓ Showers
- ✓ Glassware

### D QUICK CHANGE RO SYSTEM

**quik CHANGE**  
RO SYSTEM

Removes and reduces the things you don't know is in your water before you drink it.

- ✓ Lowest price per gallon
- ✓ Dedicated faucet
- ✓ Better tasting water
- ✓ Fresher, crisper tasting beverages
- ✓ Safer, healthier
- ✓ MORE delicious water!
