

TWF SEAMLESS RAIN GUTTERS LLC

Since 2018, TWF Seamless Rain Gutters has provided experienced system design and the highest quality installation in the central valley. The following are just a few specifications that separate us from the competition.

WARRANTY

- 1 year workmanship on our repairs and re-sealings to pre-existing systems.
- 5 year Workmanship warranty on our Gutter/Downspout/GutterGuard Installs.
- 30 Year Extended limited/Workmanship Warranty. Contingent on yearly Cleanings for the 30 years. Covers failure of joints, endcaps, corners, downspout joints resulting in water leaking from these areas. Also covered is Clogs/debris build up resulting in water overflow. Once customer opts out of yearly cleaning, that year will be the last the extended warranty is offered.

HIGH QUALITY PRACTICES

- ATTACHMENT - All gutter supports are spaced every two feet.
- ROOF FLASHING- Back of new gutter will be installed behind existing roof flashing.
- DRAINAGE - Ensure best possible slope of new gutter towards downspouts.
- CLEAN UP - Detailed clean up at completion and extra care to landscape.

MATERIALS

- SEALANT - Commercial grade sealant is used in all gutter corners and endcaps (and in seams for repairs to existing systems).
- PAINT FINISH - Factory pre-painted baked on enamel (unless otherwise specified).
- NON-RUST ALUMINUM MATERIAL - Used for all gutters and downspouts (unless otherwise specified).
- SEAMLESS GUTTER - Custom made to fit on job site (unless otherwise specified). Aluminum gutter material to be industry standard gauge of .027.
- LEAF SCREEN - Four foot sections are overlapped and fastened to gutter lip.
