MEMORANDUM

TO: All Interested Parties

RE: Brothers' Construction, Inc.

DATE: 10 November 2017

It is with enthusiasm, and a great sense of pride, that I recognize Brothers' Construction, Inc. (BCI). Recently, BCI completed a major City of Sebastian construction project to rebuild piers/docks that were severely damaged in the 2016 Hurricane Matthew storm event. The nature of this project was/is of major importance to Sebastian since our City promotes, and depends on, access to the Indian River Lagoon, the Atlantic, and citizen 'connection' to our waterfront. I am pleased to report that BCI distinguished their company, in a very positive manner, and truly worked as a partner with the City toward successful project completion.

BCI's professionalism and attention-to-duty extended from top to bottom. Everyone on their staff worked hand-in-hand with City staff toward a quality product deliverable. Reports from my staff indicate that BCI's quality of work is exceptional, their work sites were maintained in a respectful manner, and cooperation was always 100%. My personal experience with BCI's management team is above all other contractors I have worked with. I consider BCI to be in the top 1% of construction firms in their field.

I am available, at the connections on the above letterhead, to answer specific questions on Brothers' Construction, Inc. Thank you for allowing me to share my thoughts on this outstanding company.

Joe Griffin
City Manager
