

Pelican Pipeline

Project Facts

Location:
**Williams, LA
to Ragley, LA**

Parishes Crossed:
5

Construction timeline:
2026 - 2027

Mainline Test pressure:
1,800 psi

Operating pressure:
850-1,440psi*
*pounds per square-inch

Mainline diameter:
36-42"

Jobs:
~700
Skilled workers during construction

Product:
Natural Gas

Volume:

2.5 bcf/d

Designed to provide electricity for
up to **~25.5M** homes

Right of way:
**95% Parallel
Existing Utilities**

Sales and use taxes through
construction:
~\$23.4 Million

Shut off valves:
9

Length:
~160 miles

Compressor stations:
2

[1] Words such as "anticipated," "expected," "targeted," "projected," "estimated," and similar expressions are intended to identify forward-looking statements. These forward-looking statements rely on a number of assumptions concerning future events and are subject to a number of uncertainties, factors and risks, many of which are outside the control of the Company, which could cause results to differ materially from those expected by management of the Company.
