Marsh Service Pro

State-of-the-Art Tech

Safe and Effective Disinfection of Virus-infected Areas

Responsive

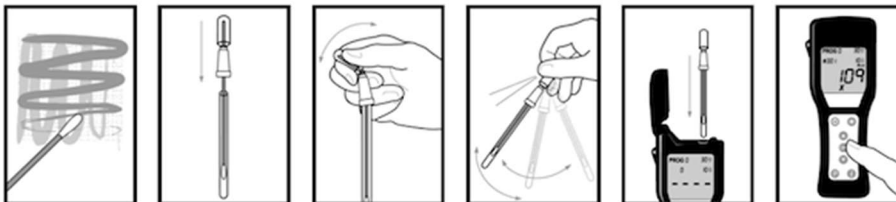

Marsh Service Pro recognizes that the current outbreak of **COVID-19** has created the need for responsive remediation and decontamination services. We have the equipment and expertise to reduce your risk.

Tech Based

Our Team of Experts, trained to OSHA standards are equipped with the latest tech and are ready to provide a variety of packages to safeguard you, your family and your business. Our surface treatment system combines proven electrostatic technology to kill viruses and bacteria in the hardest to reach places.

ATP Surface Testing

Our ATP test is a process of rapidly measuring actively growing microorganisms through detection of adenosine triphosphate, or ATP. Testing before and after disinfection, provides true peace of mind.

ATP Surface Testing cotton swab samples provide fast results within minutes, to help focus our attention on areas that need it most.
