

# Lab Test® Products

The Proper Tool for Your Finishing Job

## GRID PLATES & DIFFUSERS

- ★ **490 Plus®** Grid Plates
- ★ **Lab Safe®** Grid Plates
- ★ **Thermal Dry®** Grid Plates
- ★ Resilient Grid Plates (RG)
- ★ SteamWeave™ Diffusers **NEW**

## PRESS PADS

- ★ Excel Pads
- ★ Clean Pads
- ★ Slick Pads
- ★ Unique Pads

## COVERS & ACCESSORIES

- ★ Insulating Head & Buck Covers
- ★ Puffer Covers
- ★ Laundry Covers & Felts
- ★ Ironing Board Covers
- ★ Pressing Machine Hose Covers
- ★ Iron Hose Covers
- ★ Iron Parkers — custom available
- ★ Steam Tunnel Bags

★ ★ ★

Quality and innovation  
in every product.

**WE WELCOME ALL CUSTOM ORDERS**

**Manufactured By: Lab Test® Products Inc.**

201 Pond Avenue • Suite 2

Middlesex, NJ 08846

## Why Insulate Your Pressing Machines?

THE NUMBERS BEHIND THE COVERS

**300° → 120°**

RADIATED HEAT AT THE HEAD & BUCK

**5-7%**

OPERATING ENERGY SAVED

**350K**

BTUS A PRESS USES DAILY

*"I have reviewed the performance of the Lab Test Insulators and determined that these covers will save approximately 5% to 7% of the operating energy cost. The cover reduces heat loss while providing a safer head operating temperature... resulting in saving energy and protecting workers from hot surfaces."*

**Stanley Fox, Professional Engineer**

Senior Engineer for the design and construction of nuclear and fossil-fueled power plants

### NASA STUDY

Research on factory workers has shown that excessive heat slows workers down and increases the likelihood of safety problems, poor morale, absenteeism, and high turnover.

**Lab Test® invented and patented**  
the pressing machine insulating cover.  
U.S. Patent No. 5,755,049

**Call your Lab Test® distributor  
and start saving money today!**

# INVENTED & PATENTED BY LAB TEST®

*Insulating Head & Buck Covers reduce radiated heat from 300° to 120° — significantly increasing productivity and quality.*

**DON'T BE FOOLED BY CHEAP IMITATIONS — INSIST ON THE ORIGINAL, CUSTOM MADE FOR ALL PRESSING MACHINES**

## ★ Head & Buck Covers ★

### Maximize Efficiency

Lab Test® patented insulating head and buck covers contain the radiant heat normally lost to the environment. The pressing surface stays hotter, resulting in drier steam — and drier steam means better pressing and higher quality.

### Safety

Safety is a major concern for every plant owner and manager. By masking all exposed hot surfaces, Lab Test® covers greatly reduce the risk of burns and make every pressing machine safer to operate.

### Conserves Energy

The average pressing machine consumes 350,000 BTUs of energy per day. Insulating saves energy — in most cases as much as, if not more than, insulating the steam lines.

Long lasting & durable

Lightweight

Burnout proof

Cleanable

Easy installation

Reduces heat loss

## ★ A Better Workplace ★

### Creates a Much Better Working Environment

- ✓ Greater productivity
- ✓ Better quality
- ✓ Operators will not burn themselves
- ✓ Drier steam without radiating heat from the head and buck
- ✓ Will not radiate heat to compete with fans or air conditioning

### Lab Test® does all custom work for your pressing insulation and finishing needs.

Simple do-it-yourself installation · Custom made for most machines

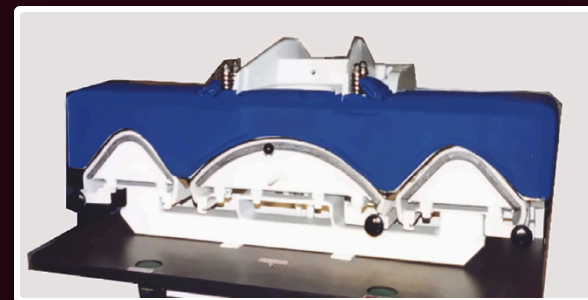

#### WHEN ORDERING

Please provide the make and model number of your press, indicate a left or right press, and specify scissor, offset, or fast-back.

Compatible with all major pressing machine brands, including Unipress, Forenta, Hoffman-New Yorker, and Ajax-American.

## ★ More Insulation ★

### ★ Insulating Laundry Machine Covers

#### ONLY FROM LAB TEST®

A hot head insulating cover for all laundry presses. These covers ensure a safer working environment and more productive pressing.

### ★ Pressing Machine Hose Covers

Made with special high-temperature Velcro and insulated with a special high-temperature felt. Can be used with or without our insulating head cover.

Easy to install

Will not radiate heat

Prevents burns

**MADE IN THE USA.** Every Lab Test® cover is custom made to the make and model of your machine.
