## REFERENCE: "WIPE-OUT ACCELERATOR™" © by Sharp Shoot R Precision Products

WIPE-OUT ACCELERATOR™ IS NOT A CLEANER BUT AN ADJUNCT TO BE USED WITH Wipe-Out™ Brushless Bore Cleaner and Patch-Out™ and Tactical Advantage sold by the chemical division Sharp Shoot R™ Precision Products® for shooters. The new sister product is an answer to a problem where the shooter has a limited time in which to clean his firearm or has very large amounts of COPPER present in the bore.

The recommended use for **WIPE-OUT™**, **PATCH-OUT™** and **TACTICAL ADVANTAGE™** is to apply it and let it set to dissolve the fouling from the barrel for at least an 15 minutes. Many shooters need a product that will clean in the shortest time possible because they have severe time constraints. The body of competitive shooters falls in to this group because they all have minimal amounts of time to clean their firearms between relays. Additionally during break-in of a barrel it is normal to clean the barrel every few shots for at least the first 100 to 150 rounds. Or you may be a high volume shooter , who shoots a large number of rounds before being forced to clean due to the degradation of accuracy. In these particular situations a faster method of cleaning is necessary.

**WIPE-OUT ACCELERATOR™** was developed to answer those problems and many more.

### Application Method with WIPE-OUT™

**WIPE-OUT ACCELERATOR™** is extremely easy to use. You wet a patch with **WIPE-OUT ACCELERATOR™** and push it through the barrel. While **WIPE-OUT ACCELERATOR™** is still wet in the bore you simply apply **WIPE-OUT™** . Then you patch out after 15 or 20 minutes.

### Application Method with PATCH-OUT™ and TACTICAL ADVANTAGE™

**ACCELERATOR™** and **PATCH-OUT™** or and **TACTICAL ADVANTAGE™** are placed on a nylon brush, a mop, or a loose patch together at the same time in a 2 to 1 ratio. (2 DROPS CHEMICAL / 1 DROP ACCELERATOR) i.e. 10 & 5etc. Please do not pre-mix them. (They have a limited active life when pre-mixed.)

Our tests show that using **WIPE-OUT ACCELERATOR™** in combination with **WIPE-OUT™**, **PATCH-OUT™** and **TACTICAL ADVANTAGE™** will effectively dissolve twice as much fouling. Or in other words it will make **WIPE-OUT™**, **TACTICAL ADVANTAGE™** and **PATCH-OUT™** work twice as fast.

**WIPE-OUT ACCELERATOR™** is not meant to be used by itself as a cleaner, but is a catalyst that enhances the action of **WIPE-OUT™**.

**WIPE-OUT ACCELERATOR™** is as safe to use as **WIPE-OUT™**, **PATCH-OUT™** and **TACTICAL ADVANTAGE™** are, and in no manner compromises the safe use of either product.

Loss of accuracy is normal in all firearms after they have been used in a prolonged shooting session. The barrel will become fouled with gun powder residue as a result of combustion, additionally: two other materials are deposited internally to the barrel, carbon and metal fouling from bullet material . These two are the most difficult to remove and are the greatest cause for the loss of accuracy in a firearm.

Most traditional bore cleaners are in one of three categories: 1. Not effective and require large amounts of brushing, 2. Semi-effective, but containing large amounts of acid and ammonia and require large amounts of brushing. 3. Semi-effective but so harsh that the user is afraid to be in their presence without-a Bio-suit. Old methods, with harsh chemicals were and are neither safe for the firearms , the environment , or those shooters who used them.

Removal of metal fouling and carbon from the bore can rejuvenate and restore accuracy to and badly fouled firearm. Heavy amounts of brushing to the bore of a firearm can produce damage and un-necessary wear. New **WIPE-OUT™** **PATCH-OUT™**, **TACTICAL ADVANTAGE™** and **ACCELERATOR™** were formulated to utilize technology in the safe removal of all

types of fouling from the barrel faster, and more efficiently.....and without brushing.

The criteria for this new product WIPE-OUT ACCELERATOR™ were a tough group to satisfy individually let alone collectively. Sharp Shoot R Company developed this product with the aid and consultation of competitive shooters, gunsmiths, barrel makers, and manufacturers within the firearms industry. The resulting research and development team produced a revolutionary new type catalyst to enhance the great properties of WIPE-OUT™ Brushless Bore Cleaner©:

- I. WIPE-OUT ACCELERATOR™ will dissolve copper , bronze, cupro-nickel, brass fouling in the bore twice as fast and in half the time without brushing.
- II. WIPE-OUT ACCELERATOR™ will protect all metal parts including the bore against corrosion & rust.
- III. WIPE-OUT ACCELERATOR™ is totally safe for all steels (both stainless and carbon)
- IV. WIPE-OUT ACCELERATOR™ is harmless to modern gunstock finishes. (it is not for use on shellac, varnish or oil)
- V. WIPE-OUT ACCELERATOR™ dissolves carbon without brushing
- VI. WIPE-OUT ACCELERATOR™ dissolves smokeless powder fouling, and black powder fouling, and primer fouling.
- VII. WIPE-OUT ACCELERATOR™ has color indicators show the presence of metal fouling, powder fouling and carbon. (Metal fouling is navy blue, Powder fouling is grey or black, Carbon is tan or brown.)
- VIII. WIPE-OUT ACCELERATOR™ is odorless, relatively safe and easy to use.
- X. WIPE-OUT ACCELERATOR™ cannot gum or leave behind solids that render the firearm useless.
- XI. WIPE-OUT ACCELERATOR™ contains NO ACID and NO AMMONIA.

The final products “ WIPE-OUT™ - PATCH-OUT™ - TACTICAL ADVANTAGE™ Brushless Bore Cleaner© “ and WIPE-OUT ACCELERATOR™ both have undergone extreme testing by Competitive Shooters, Gunsmiths, Law Enforcement Agencies, and manufacturers within the firearms industry. Test results were dramatic , in each and every case Wipe-Out™ and WIPE-OUT ACCELERATOR™ removed all traces of metal fouling, powder fouling and carbon. . . . . with no brushing !!

WIPE-OUT ACCELERATOR™ is available in a 8 ounce plastic bottle with a flip top lid. This bottle is capable of cleaning the amount of firearms that can be cleaned with 4 or 5 cans of WIPE-OUT™. Or PATCH-OUT™) The suggested retail is \$9.99 per bottle, and is manufactured and sold by , Sharp Shoot R Precision Products®. The product is available to all distributors, and dealers in this market area.
