Directions:

Iron fusible onto the back of the Ogre hand and spider body fabric Fig 2 & Fig 3. Trace them on paper side of fusible, (Fig. 3 has been reversed), the spider body Fig. 2 doesn't matter. Cut out and remove paper backing.

WEB: For web pattern use Fig. 4 cut out a top, backing and batting. Use a blue water soluble marker to mark the spiderweb and the slit. Cut the slit in the top fabric. Position the hand over the slit, (making sure the little finger won't get caught in seam allowance), press only the seam allowance of the hand, this will hold the hand in place while stitching the sandwich, **(THIS IS EXTREMELY IMPORTANT)!** Mark 1/4" seam on each side of batting. Make a sandwich start with the batting, marked side down, backing fabric right side up, top fabric right side down, (make sure the hand lays flat). Stitch the sandwich from batting side, pivoting in corners where marked lines make an X. Trim corners and seams. Turn right side out through slit. Push out corners. Lifting the hand out of the way press the mug rug.

Leaving the hand loose, stitch marked web with sliver metallic thread, or a thread that will look web like. Stitch spokes first then the arcs. Use Fig. 1 for placement for of spider body, press into place. Mark legs with blue water soluble marker. Press the Ogre hand into place mark fingernails. Stitch around the Ogre hand with matching thread. With black thread stitch around spider body, then the legs. Stitch the fingernails.

Remove blue marked lines with **Blue Line Eraser**

Ta Da..... Done!
