

## FREE Casio Electronic Cash Register\* with integrated credit card processing

Future POS can provide your business with a Casio electronic cash register with integrated credit card processing. Designed with the most demanding restaurant and retail environments in mind, this ECR delivers rugged hardware and stylish design while offering a wide range of useful features. Additionally, the keyboard layout can be customized through a simple and easy to use online wizard, allowing you to know the exact specifications of your register before it ever reaches your doorstep. Complete with cash drawer and backlit customer display, this electronic cash register is the perfect solution for any retail or restaurant establishment.

### INTEGRATED PAYMENT PROCESSING

Each electronic cash register comes complete with a secure PCI compliant integrated payment terminal to enable credit and debit card payments. This secure device supports either dial-up or ethernet connectivity and its sleek, compact design fits easily in the palm of your hand. With a wide array of convenient features including guest check tracking, it is the perfect device to streamline your electronic payment system.

- Accept all major credit cards directly through your electronic cash register, including Visa, Mastercard, Discover Network and American Express
- Track your daily cash, check and credit card sale as well as taxable and non taxable sales
- Customizable keypad layout with a simple, user friendly online wizard
- Guaranteed replacement cash register if yours breaks or malfunctions, completely free of charge
- Dial-up or Ethernet connection
- Large LCD display and backlit customer display
- Multi-application support
- Exceptional 24/7 customer service & technical support
- Rugged hardware and stylish design
- Heavy duty cash drawer
- Drop and load thermal printer
- PCI compliant
