Services Overview

1

Diagnostic Data & Implementation Planning

We measure the culture and equitable systems and practices of your school and current capacity of staff to engage in work related to diversity, equity, inclusion, and cultural competence.

2

Equity Mapping & Cultural Capacity Development

After developing a plan with your team aligned to strategic outcomes, we develop a personalized professional learning plan with implementation milestones. Our core professional learning experiences are multi-pronged to develop practices and build trust across teams.

3

Strategic Planning & Change Management Supports

Whether you are turning around a school or faced with district consolidation, change can be challenging. We offer ongoing strategic planning and change management supports and organizational culture solutions.

4

Pop-Up Professional Learning Events

Our signature "pop-up pd's" are intended to be laser-focused and in-depth with a few core concepts. Our 1 or 2-day goals are tailored to meet your district's specific needs (on-site) OR feature interactive sessions through an off-site event which provides networking across districts.

5

Free Online Membership Resource Center

Our website offers a robust repository of articles with embedded protocols you can implement. In addition, we have a free member resource center which provides tools focused on leadership and culture.

6

1-on-1 Executive Coaching for Administrators

School leaders must be supported through ongoing development and targeted coaching. When leaders are valued through meaningful, personalized learning, this translates to daily actions and behaviors.
