

SUSPENSION SHIPPING INSTRUCTIONS

1. **Remove** any push button type air bleeders and fit original air bleeders before packing. Zip tie shock bearings.
2. Pack any leaking forks or shocks in plastic bags to contain any leaking oil.
3. Pack all suspension components in one box together or wrap altogether with cardboard. (Try and keep parcel length to 1m if sending with Aust Post)
4. Use cardboard or bubble wrap to separate them inside the package (to avoid damage) tightly pack components, tape up very strongly. DONT USE ELECTRICAL TAPE OR ZIP TIES!
5. Print off the customer PDF order form located on the “**RESOURCES**” tab of the webpage, fill in your details and put in the parcel with your suspension.
6. Label the package correctly & clearly (making sure the address cannot be rubbed or torn off)
7. Use Aust post for reliability and costs.
