

Goose Service

FlightControl Plus is

- Spray applied on turf where geese feed.
- Odorless
- Waterproof
- Eco-friendly
- Pet & Family friendly
- Persistent (works 24/7)

AAAC Wildlife Removal's Goose Service provides an eco-friendly, humane method of moving unwanted geese from athletic fields, golf courses, residential turf, parks and recreational areas, corporate campuses and school yards. FlightControl Plus delivers a humane solution that keeps geese away without harming them.

How AAAC Goose Service Works:

- ~Geese feed on treated turf & experience a harmless, but effective intentional reaction.
- ~Geese also can see the compound in the ultraviolet spectrum of light (which people cannot see)
- ~Geese become conditioned to avoid treated areas and find new feeding sites away from your treated turf. The visual warning along with the mild intestinal reaction equals a threat with consequence.
- ~Requires 4-6 treatments the first year and less each following year as you train geese off your turf.
