

DND Solutions, LLC Capability Statement

Company Overview

DND Solutions is a mission-focused telecommunications and infrastructure firm with 50+ years of combined leadership experience. We deliver **turnkey wireless, wireline, low-voltage, and access control systems nationwide**. With **federally cleared crews** and a **strong vendor network**, we provide secure, scalable solutions across federal and commercial markets.

Core Competencies

- **Wireless Infrastructure** — Site acquisition, zoning, tower builds
- **Wireline Solutions** — Fiber design, aerial/underground, splicing
- **Low Voltage Systems** — Cabling, WAPs, CCTV integration
- **Access Control** — FIPS-compliant physical security
- **Secure Facilities** — Cleared, BICSI-certified crews
- **Project Management** — End-to-end, schedule-driven delivery
- **Logistics Support** — Nationwide cleared deployments
- **Cyber Compliance** — CMMC Level 1 certified

Differentiators

- **Direct DoD Prime Contractor** — proven federal performance on secure systems
- **Nationwide Cleared Workforce** — internal + vendor resources in all 50 states
- **Agile Rapid-Response Teams** — coast-to-coast deployment under tight timelines
- **BICSI-Certified Crews** — quality assurance on complex telecom builds
- **Stable Vendor Network** — long-term cleared subcontractor partnerships
- **Strategic 8(a) Partnership** — Seneca Federal Solutions for federal delivery

Past Performance

- **Dept. of Defense** — Air Force & Army: Installed FIPS-compliant access control and communications systems for multiple Air Force and Army sites. Delivered structured cabling, WAP installs, and secure networks with cleared nationwide crews.
- **Dept. of Justice** — Secure Federal Facilities: Completed structured cabling and low-voltage work across 113 facilities in the U.S., Puerto Rico, and Hawaii. CMMC-compliant delivery with BICSI-certified crews for high-security DOJ sites.
- **Broadband & Telecom Infrastructure**: Deployed multi-state fiber and wireless networks, including design, splicing, and full project management.
- **Tower & Wireless Networks**: Built rural and urban towers supporting broadband expansion, site acquisition, and turnkey wireless delivery.
