

Please allow me to introduce Midstate Steel Inc. to you.

We are a Heavy Industrial Construction company located in Macon, GA. We specialize in the fabrication and erection of Custom Industrial Structural & Plate Steel.

In addition to being OSHA & MSHA compliant and a member of ISNetwork, Avetta and Textura we have also earned the distinction of being a Certified Fabricator listed with the American Institute of Steel Construction (AISC).

We are one of the most respected leaders in steel fabrication and industrial construction throughout the Southeastern United States. Midstate Steel Inc. was established in 1987 and our parent company, Macon Machine Shop, was established in 1920.

In addition to our 100,000 square foot state of the art fabrication facility, we also maintain an outside operations division with the capability to install our own products as well as products fabricated by other facilities.

We would welcome the opportunity to assist your current and future efforts by offering our steel fabrication and erection capabilities.

Please feel free to contact us for more detailed information and any opportunities to utilize our service.

Thank You,

Midstate Steel Inc.
