

Instructions on how to remove your wreath from its box

A wreath may sometimes have a long journey before it arrives to its new home. To ensure that it survives the journey, extreme care has been taken during packing.

- ~To remove your wreath, locate the three brightly colored pipe cleaners. (The color is usually neon and very different than the colors used in your wreath.)
- ~Twist the pipe cleaners to loosen.
- ~Separate the pipe cleaners.
- ~You can now remove the wreath by carefully pulling it out of the box.

Tip: The pipe cleaners have been threaded through the outside of the box and secured with tape. You can also remove the wreath by removing the tape then cutting the pipe cleaners at these points (outside the box) to remove the wreath.

I hope you enjoy your wreath for many seasons to come!

~Liliana
