

- F1 Rare case of Nocardia Otitidiscavirum Septicemia with Complicated Loculated Empyema in an Immunocompetent Patient  
Kyle Gordon, MD
- F2 Pulmonary Brucellosis in a Haitian patient requiring V-V ECMO  
Lara E. Saikaly, DO, MPH
- F3 Association Between GLP-1 Receptor Agonist Use and Mortality Among COPD Patients  
Hossny Alaws, MBBCh
- F4 Effectiveness of Hypoglossal Nerve Stimulation Therapy in Positional Obstructive Sleep Apnea: A Single Center Evaluation  
Lidice Hernandez, MD
- F5 Safety of Opioids in Idiopathic Pulmonary Fibrosis  
Sanjana Ramakrishnan, MD
- F6 Ensifentrine Monotherapy Improved Lung Function, Symptoms, Quality of Life, and Reduced Exacerbation Rate and Risk in Symptomatic Patients with Moderate-to-Severe COPD  
Funded by Verona Pharmaceuticals
- F7 Ensifentrine Reduced Exacerbation Rate Regardless of FEV<sub>1</sub> Improvement: A Post-Hoc Pooled Analysis  
Funded by Verona Pharmaceuticals Inc
- F8 The Physicochemical Properties of Anaphylm™ Under Extreme Temperatures and Real-World Conditions  
Funded by Aquestive Therapeutics, Inc
- F9 Ensifentrine Reduced Exacerbation Rate Regardless of FEV<sub>1</sub> Improvement: A Post-Hoc Pooled Analysis  
Funded by Aquestive Therapeutics, Inc
- F10 Molgramostim Improves Pulmonary Gas Exchange in Patients with Autoimmune Pulmonary Alveolar Proteinosis (PAP): Results From the IMPALA-2 Phase 3 Clinical Trial  
Funded by Savara Inc
- F11 Rapidly Fatal Pulmonary Arterial Hypertension: Phentermine Precipitating Right Ventricular Failure in a Woman with Lupus  
Winy. Kujundzic, MD
- F12 Severe Radiation-Induced Pseudomembranous Tracheobronchitis Following High-Dose Thoracic Radiation for Metastatic Squamous Cell Carcinoma  
Brooke Norton, MD
- F13 Effect of Tezepelumab on exacerbations in patients with moderate to very severe chronic obstructive pulmonary disease based on inclusion or exclusion of antibiotic use in the definition of moderate exacerbations: data from the phase 2a COURSE study  
Funded by AstraZeneca and Amgen
- F14 Tezepelumab reduces and eliminates OCS use in OCS-dependent patients with severe asthma: primary results from the phase 3b WAYFINDER study  
Funded by AstraZeneca and Amgen
- F15 Onset of action of tezepelumab in adults with severe, uncontrolled chronic rhinosinusitis with nasal polyps in the phase 3 WAYPOINT study  
Funded by AstraZeneca and Amgen
- F16 Dupilumab Safety and Efficacy in a Real-World Clinical Setting: The Rapid Asthma Registry  
Funded by Sanofi
- F17 Association between Baseline Fractional Exhaled Nitric Oxide and Mucus Response in Patients with Uncontrolled Moderate-to-Severe Asthma Treated with Dupilumab in the VESTIGE study  
Funded by Sanofi
- F18 Use of Systemic Corticosteroids and Antibiotics in Patients with Chronic Obstructive Pulmonary Disease (COPD) and Type 2 Inflammation Receiving Dupilumab  
Funded by Sanofi
- F19 Efficacy of Brensocatib in Patients with Eosinophilic Inflammation in Non-Cystic Fibrosis Bronchiectasis (Bronchiectasis): An Analysis of the ASPEN Trial  
Funded by Insmed
- F20 Safety and tolerability of treprostinil palmitil inhalation powder (TPIP) in pulmonary hypertension associated with interstitial lung disease (ILD-PH)  
Funded by Insmed
- F21 Functional Respiratory Imaging (FRI) Markers Correlate with Clinical Endpoints in a Phase 2 Study of Treprostinil Palmitil Inhalation Powder (TPIP) in Patients with Pulmonary Hypertension Associated with Interstitial Lung Disease (ILD-PH)  
Funded by Insmed
- F22 Efficacy of Brensocatib in Patients with Non-Cystic Fibrosis Bronchiectasis (Bronchiectasis) With vs Without Maintenance Use of Macrolides: An Analysis of the ASPEN Trial  
Funded by Insmed

- F23 The number needed to treat with dupilumab to prevent moderate or severe chronic obstructive pulmonary disease exacerbations: BOREAS and NOTUS  
Funded by Sanofi
- F24 Dupilumab Plus Medium-Dose Inhaled Corticosteroid Improves Outcomes Compared with Placebo Plus High-Dose Inhaled Corticosteroid in Pediatric Patients with Uncontrolled Asthma  
Funded by Sanofi
- F25 Dupilumab Efficacy in Patients with Chronic Obstructive Pulmonary Disease (COPD) with Type 2 Inflammation across Baseline Eosinophil Counts  
Funded by Sanofi
- F26 Unmasking Seizures: A Heavy E-Cigarette User Case Report  
Jude Tabb, MD, Yerandy Gil, MD
- F27 A Rare Case of a Non-Caseating Mycobacterium Tuberculosis Endobronchial Tumor: A Diagnostic Challenge  
Karina Gonzalez, M.D
- F28 Robotic Assisted Bronchoscopy in Case of Airway Situs Inversus  
Melissa Tebaldi, DO
- F29 Rituximab-Induced Lung Disease Presenting as Organizing Pneumonia in a Patient with Stable Rheumatoid Arthritis  
Ofek Raviv, MD
- F30 MASS-ive Airway Compromise: A Rare Cause of Respiratory Failure
