## EXPERIENCE

### Senior IT Program Manager - Governance & Operations

Zayo LLC| Denver, CO | March 2024 – Present

- Provide governance leadership for enterprise-wide programs supporting IT operations, security, and digital transformation initiatives.
- Oversee a \$3M+ portfolio, ensuring financial controls, funding governance, and alignment to strategic objectives.
- Establish and enforce the program governance standards within the ePMO, including risk management, reporting cadence, and compliance checkpoints.
- Lead executive-level reporting through dashboards and scorecards, enabling transparency into performance, risk exposure, and delivery health.
- Evaluate governance and control implications of AI adoption, ensuring alignment with audit, compliance, and enterprise risk standards.
- Ensure audit readiness and preparedness.
- Drive adherence to internal controls, quality standards, and regulatory expectations.

### Cyber Engagement Manager Promoted to Director of Operations

Solis Security & CFC Response | UK & Austin, TX | October 2021 – May 2023

- Directed day-to-day business operations for incident response and managed security services, leading six (6) project managers and analysts.
- Designed and implemented governance frameworks for billing, case management, and service delivery operations.
- Reduced operational cycle time by 33% and overdue billing by 70% through process redesign and control improvements.
- Established standardized reporting, performance metrics, and executive dashboards to support leadership decision-making.
- Implemented a Customer Success operating model that increased client satisfaction by 20% post-incident.
- Served as DEI&B Lead for Texas, embedding inclusive leadership principles into operational practices.

## EXPERIENCE Cont'd

### IT Manager Promoted to Senior Manager, Financial Systems & Compliance

Vericast | San Antonio, TX | November 2015 – August 2021

- Led governance and operational oversight for enterprise financial systems and different areas of IT service management functions – Change Control, Incident, Demand, Service Request, and OPS Management.
- Directed ServiceNow and Cherwell implementations to standardize processes, controls, and reporting across IT operations.
- Ensured 99.9% system uptime while maintaining regulatory and operational discipline
- Chaired the Change Advisory Board
- Owned IT General Controls (ITGC) and audit readiness across SOC 1 & 2, SOX, ISO, PCI, HIPAA, and GDPR environments.
- Developed Key Performance Indicators (KPIs), dashboards, and a Monthly Record-to-Report system to support compliance reporting, coupled with improving transparency and executive visibility.
- Partnered with Finance, IT, and external auditors to remediate findings and strengthen control maturity.

### Manager, IT Business Services – Enterprise Service Management

Computer Sciences Corporation / Ascension Information Services | St. Louis, MO | July 1995 – April 2015

- Provided long-term leadership in enterprise IT governance, service delivery, and operational planning across regulated and mission-critical environment.
- Designed, implemented, and governed ITIL-aligned IT Service Management frameworks, including Change, Incident, Problem, Release, and Service Request Management. Including Chaired and facilitated Change Advisory Board (CAB) meetings; reviewed, assessed, approved, and documented standard, normal, and emergency changes in accordance with risk and compliance requirements.
- Established and enforced SDLC governance controls, ensuring proper approvals, segregation of duties, testing evidence, and release documentation throughout development and deployment lifecycles.
- Partnered with application development, infrastructure, and security teams to ensure SDLC activities aligned with audit, SOX, and control requirements.
- Collaborated closely with Finance, Compliance, and Security teams to align IT operations with enterprise governance and regulatory expectations.
- Developed and maintained SOX-compliant process documentation, including narratives, flowcharts, risk-control matrices (RCMs), and control evidence.
- Supported SOC 1 and SOC 2 audit activities, coordinating walkthroughs, control testing, evidence collection, and remediation efforts with internal stakeholders and external auditors.
- Conducted IT risk assessments across change management, access controls, and incident management, patching, and system availability, identifying gaps and implementing corrective actions.
- Designed and monitored SLAs and OLAs, tracking performance metrics such as change success rate, incident resolution time, and audit compliance adherence.
- Built executive dashboards and operational reports to provide visibility into service performance, risk exposure, audit findings, and compliance status.
- Led and coached large, distributed, and offshore teams supporting software development, infrastructure operations, and production support.
- Supported ongoing internal audits, external audits, and regulatory reviews, ensuring sustained audit readiness and continuous process improvement.
