

# Capability Statement

**DIMES Automation & Power Engineering Services - LLC** provides professional engineering, consulting, and technical solutions in **Electrical Engineering and Industrial Automation**, supporting the design, integration, commissioning, and lifecycle needs of industrial systems across a diverse range of industries.

## Core Competencies

### Engineering Strategy

- Electrical & Controls Design
- Codes, Standards, & Compliance
- Safety Design & Analysis
- Project Management & Support

### Implementation

- Proof of Concept
- Test Engineering & Validation
- Systems Integration
- Installation & Commissioning
- Lifecycle Support

### Technology

- Programming
- Drafting
- Data Collection & Reporting
- Computer Systems & Networks

## Differentiators

- 20+ Years of design-to-field engineering experience across diverse industrial applications and environments.
- Strong multidisciplinary foundation supported by advanced engineering education, professional credentials, and continuous technical development.
- Successful automation project execution throughout full project lifecycles.
- Engineering leadership and practices that ensure lasting value for clients and stakeholders.

## Company Data

- Established June 24, 2022, Pennsylvania Entity #7553402, LLC
- Unique Entity ID VL3XLGVV1XJ3, CAGE Code 9EP85
- Pennsylvania Occupational License #210529474
- Pennsylvania PE #PE093308
- Fully Insured

## Sample Past Projects

|                                                                                                                                                                             |                                                                                                                                                                                                                                    |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ul style="list-style-type: none"><li>• Modernized and upgraded automated conveying and package-sorting systems at U.S. Postal Service distribution facilities.</li></ul>   | <ul style="list-style-type: none"><li>• Designed, integrated, and commissioned automated conveying, packaging and robotic systems for medical and pharmaceutical manufacturing facilities.</li></ul>                               |
| <ul style="list-style-type: none"><li>• Designed, programmed, integrated, and commissioned PLC/HMI control systems for hydraulic dam and navigation lock systems.</li></ul> | <ul style="list-style-type: none"><li>• Installed, commissioned, and supported automated packaging machinery, including controls verification, troubleshooting, production validation, and operator/maintenance training</li></ul> |

## NAICS Codes

- 541330 – Engineering Services
- 541690 – Other Scientific & Technical Consulting Services

## Registrations

- Professional Engineer – PA
- Certified Electrical Safety Compliance Professional
- Certified Machinery Safety Expert
