

RF / MICROWAVE / LIGHTWAVE COMPONENTS AND EQUIPMENT

Huber+Suhrner, Inc.

RF, microwave, and mmwave interconnect products for industrial, military, defense, and space applications including connectors, cables, and cable assemblies like the **Sucoflex** and **minibend** families. H+S also manufactures antennas, protection and feeder line components and RF protection solutions for lightning, electromagnetic pulse, and high power microwave. Antennas and RF-over-Fiber products are also offered.

Agile Microwave Technology

Microwave frequency active components including low noise amplifiers, High Power Amplifiers, Multipliers, Limiters & Switches. Also capability for RF/Microwave Packaging, RF/Microwave integrated modules, Image Reject Mixers.

Charter Engineering

A leading manufacturer of RF/Microwave coaxial electro-mechanical relay switches from DC to 40GHz including ultra low passive intermodulation, very high power, and extremely low temperature for commercial and military applications.

Heavyside Corp.

Value-Added-Reseller of CST Studio Suite® software as an official channel partner of Dassault Systemes Simulia simulation software. Heavyside provides sales and technical support including training and additional services.

Norden Millimeter

500MHz up to 110GHz components: Amplifiers, Frequency Multipliers, Frequency Converters including up/down converters, Tranceivers, Custom Integrated Assemblies for Commercial, Military, and Scientific applications. Latest introduction is a 3U 2-18GHz transceiver including internal LO's.

Micro Lambda Wireless, Inc.

YIG Based Products include Broadband Oscillator, Filters - Bandpass and Bandreject, Multipliers, Frequency Synthesizers. Microwave Tunable Lab Filters and Frequency sources. VCO-based broadband frequency synthesizers with a wide tuning range of 50MHz to 21GHz.

Paricon Technologies Corp.

Anisotropic **conductive elastomeric material** technology making possible separable interconnecting solutions. The Pariposer material is used for device test, board-to-board interconnect, etc. DC to above 60GHz. Products include test sockets, engineered contactors, space transformers.

Telonic Berkeley, Inc

Mechanically tuned filters including bandpass and bandreject, from 20MHz to 8GHz in octave frequency ranges. Both manually tuned and electronically tuned using various digital control protocols.
